CNE OFFICIALLY OPENED BY LORD MOUNTBATTEN

TORONTO (CP)—The cavalcade called the Canadian National Exhibition swung smoothly off on its 16-day journey today with bands playing, the fleet in port, and the first of nearly 3,000,000 people clicking through the turnstiles.

The CNE was officially opened by Lord Louis Mountbatten, admiral of the fleet and chief of Britain's defence staff.

IN QUEEN CHARLOTTES

Three Quakes Recorded Here

Three "fairly" strong earthquakes originating in the northwest were recorded at the Dominion Astrophysical Observatory, Saanich, early this morning. No damage was reported.

Anne Lucas, seismologist at the observatory, said she suspected the quakes centred in the Queen Charlotte Islands, about 550 miles north of Victoria.

The origin of the third is unknown, but Miss Lucas believes it also occurred in the Queen Charlottes.

The three shocks were recorded at 12:32, 2:28 and 5:02 a.m. Pacific standard time.

The quakes were fairly strong and lasted "moderately long," according to Miss Lucas.

Magnitude of the two first quakes are 4.8 and 5.1. The third has not yet been determined.

COATAZACOALCOS, Mexico (AP)—A strong earthquake shook this Gulf of Mexico port early today, injuring 17 persons and causing severe damage to roads and port installations.

Seven other persons were injured in a nearby village. The shock also was felt at Veracruz, 150 miles to the north.

DR. ANNE STEEL
...1,207th day in coma

Unconscious City Doctor Weakening

A 40-months struggle for consciousness and life weakened today as Dr. Anne Steel slipped into "unsatisfactory" condition.

"This probably is the worst she has been," a Royal Jubilee Hospital official said as the 39-year-old woman doctor entered her 1,207th day of coma this morning.

Dr. Steel has been unconscious since May 6, 1956, when she suffered a brain injury. Her horse fell while she was riding near Osoyoos, B.C., during a vacation. Her children, Phillipa and Tony, were with her at the time.

The hospital official said her school teacher husband, Phillip, and parents, Mr. and Mrs. C. I. Cookes, are continuing daily visits.

"Dr. Steel has had ups and downs throughout her coma. This is very much a down. This probably is the worst she has ever been," the official said.

Efforts to revive her since the brain injury have been unsuccessful. These included surgery by a top Victoria brain specialist, Dr. John E. Harvey, and four visits by faith healer Dr. Christopher Woodward of London, Eng.

Throughout her unconsciousness, Dr. Steel has been fed by tubes.

Born in Scotland, she is a graduate of Edinburgh University. She obtained a Canadian medical degree at Vancouver and interned at St. Joseph's Hospital.

She practised here eight years prior to her accident, in partnership with Dr. Charlotte Dghan.

\$5 MILLION SUIT THREAT IN FIGHT ROW

NEW YORK (UPI)—Fight promoter Vincent J. Velella returned from Sweden today after signing the \$3,000,000 Johansson-Patterson rematch and announced he planned to sue Bill Rosenhoen for \$5,000,000.

Velella said his contemplated suits would be for "defamation of character" in connection with Rosenhoen's statements that made him a "front man" for Anthony (Fat Tony) Salerno, a missing mobster.

Ike Given Hero's Welcome On Arrival in West Germany

ADENAUER GREETED IKE

West German Chancellor Adenauer talks with President Eisenhower after extending greetings on his arrival at Bonn today. Ike flew from Washington in jet airliner to open series of peace talks. (AP Wirephoto.)

Emergency U.S. Aid To Arm Laos Troops

Approved By Eisenhower

WASHINGTON (UPI)—The United States has decided to give Laos emergency help in arming 5,000 more troops and militiamen to deal with Communist guerrilla attacks, official sources disclosed today.

Formal announcement of the decision, expected this afternoon, is not likely to mention the 5,000-man size of the force increase or the cost of the emergency aid, officials said.

But they said the United States will foot the entire bill, including pay and the cost of uniforms and other equipment. The present 25,000-man Laotian army is entirely financed by U.S. aid.

President Eisenhower approved the basic policy decision shortly before he left for Europe.

Officials said the U.S. agrees with Laos that direct military intervention by U.S. or Southeast Asia Treaty Organization (SEATO) forces is not necessary to deal with the stepped-up Communist guerrilla attacks.

The Laotian government's special representative, Ngon Sananikone, has warned that his government faces collapse if the Communist-inspired rebellion is not soon stopped.

Dr. J. G. Paton, a local physician who met Mrs. Judy Stivers when her Pan American flight from London reached here, said the mother and her baby girls were "very well . . . they're doing just fine."

A BASEBALL GAME, YES, BUT NO ATOMS FOR NIK

WASHINGTON (AP)—Perhaps a football or baseball game but no atomic energy installations will be on the itinerary of Soviet Premier Khrushchev during his visit to the United States next month.

Soviet Ambassador Mikhail Menshikov told reporters that Khrushchev would not visit the atomic electricity-generating plant at Shippingport, Pa., or any other atomic facility.

The ambassador and State Undersecretary Robert Murphy have been meeting periodically to iron out details of the visit which begins Sept. 15.

8,000 FEET OVER ATLANTIC

Twin Girls Born Aboard Airliner

GANDER, Nfld. (CP)—A pretty 18-year-old woman who was expecting a baby sometime next month gave birth to twin girls early today aboard a big trans-Atlantic airliner, 8,000 feet above Newfoundland's east coast.

Dr. J. G. Paton, a local physician who met Mrs. Judy Stivers when her Pan American flight from London reached here, said the mother and her baby girls were "very well . . . they're doing just fine."

One of the girls weighed five pounds, the other three pounds seven ounces. Both were placed in incubators at the Banting Memorial Hospital here.

It was the first case of twins being born aboard a plane arriving here.

Mrs. Stivers is a native of Fairford, England. Her husband, William, was believed to be waiting her arrival at New York.

Two Chinese doctors, Clarence Ing and his wife Isabel, delivered the children with the help of two stewardesses, Ellen Manazik and Yolanda Sisto, both of Manhattan. Miss Manazik is a nurse. The doctors had no instruments.

The airline said it was the first time twins had been born on one of its planes and possibly the first time on any commercial overseas airliner.

PRAYER FOR TODAY

Gracious God, from whom to turn away is to fall, in whom to abide is to stand firm, enlighten us by Thy presence. May Thy light and Thy truth lead us. May the words of our mouths and the meditations of our hearts be acceptable in Thy sight; in the name of Thy Son, Jesus Christ. Amen.

Wonder what are th' visitin' hours when y're visitin' Adenauer.

There's still hope all is not Laos-ed.

Y can't complain about earthquakes long's y' git a fair shake.

Greeted in Bonn By Huge Crowds

(Times News Services)

BONN, Germany—President Eisenhower received a hero's welcome tonight in this land he helped conquer and renewed his pledge to stand by West Berlin in preserving its freedom against Communist threats.

Eisenhower, the first American president to visit West Germany, flew in from Washington on the first leg of his diplomatic venture to Bonn, London and Paris.

"In my country the name Adenauer has come to symbolize the determination of the German people to remain strong and free.

"In the implementation of that determination the American people stand by your side and they send through me and, through you to the German people their best wishes for your successful efforts in this matter.

"And the American people stand by your side in ensuring that the loyal free people of free Berlin will like yourselves continue always to enjoy that freedom."

You Are the Flag-Bearer of Freedom'

The crowd applauded Eisenhower even more loudly than they did Adenauer.

The aging Adenauer told the president it was a "great and heartfelt pleasure" to welcome him to West Germany.

"In this unusually difficult time you are the flag bearer of freedom in the whole world," he said. "I believe your exchange of talks with world leaders will secure peace in the world."

The presidential plane landed at 6:26 p.m. (10:26 a.m. PDT) after a flight of 9½ hours from Washington. This elapsed time included an hour

spent in a Newfoundland stop for refuelling.

As the plane halted, a 21-gun salute sounded. Four escorting fighters of the German Air Force flew low overhead.

There was a burst of applause as the president, wearing a dark blue suit and dark sunglasses, appeared.

A German band played the Star Spangled Banner, then the German anthem.

Eisenhower and his state secretary, Christian Herter, who flew from Washington with him, exchanged handshakes with Adenauer and the West German foreign minister, Heinrich von Brentano.

Ride in Open-Roof Car to Residence

The airport formalities out of the way in 20 minutes, Eisenhower and Adenauer set out in an open-roof car en route to the American ambassador's residence here, where Eisenhower will spend the night.

The schedule calls for Eisenhower to spend Thursday in Bonn, then fly to London that evening. He will remain in Britain until next Wednesday, then move on to Paris for two days.

WIRE BRIEFS

Marlene Beaten

WASHINGTON, D.C. (UPI)—Judy Eller of Old Hickory, Tenn., eliminated former champion Marlene Stewart Street of Fonthill, Canada, in the fourth round of the USGA women's amateur golf championship today, 3 and 2.

Storms Lash Japan

TOKYO (UPI)—Furious thunderstorms accompanied by gale winds flooded sections of central Japan today, leaving one dead and five missing. A four-year-old boy was crushed to death when a landslide buried the home in which he and his family were sleeping.

Mr. Stivers is a native of Fairford, England. Her husband, William, was believed to be waiting her arrival at New York.

Two Chinese doctors, Clarence Ing and his wife Isabel, delivered the children with the help of two stewardesses, Ellen Manazik and Yolanda Sisto, both of Manhattan. Miss Manazik is a nurse. The doctors had no instruments.

The airline said it was the first time twins had been born on one of its planes and possibly the first time on any commercial overseas airliner.

Steel Talks Resume

NEW YORK (UPI)—David J. McDonald, president of the United Steelworkers of America, returned to the bargaining table with industry negotiators today for the first time since Aug. 7.

The airline said it was the first time twins had been born on one of its planes and possibly the first time on any commercial overseas airliner.

PRAYER FOR TODAY

Gracious God, from whom to turn away is to fall, in whom to abide is to stand firm, enlighten us by Thy presence. May Thy light and Thy truth lead us. May the words of our mouths and the meditations of our hearts be acceptable in Thy sight; in the name of Thy Son, Jesus Christ. Amen.

CHURCHILL
...breaks holiday.

Churchill To Meet Ike At Dinner

LONDON (Reuters)—Sir Winston Churchill will meet President Eisenhower here Monday night, authoritative sources said today. They will be the dinner guests of Prime Minister Macmillan at 10 Downing Street.

Churchill is on vacation on the French Riviera and is flying here Sunday.

It is considered likely that Sir Anthony Eden also will be invited to Monday's dinner.

Another wartime colleague Eisenhower may meet Field Marshal Viscount Montgomery, who has voiced criticisms recently of some of Eisenhower's Second World War strategy.

Though no official announcement has been made of the names of the guests for Eisenhower's private dinner party next Tuesday, Montgomery may be one of them.

CLC Takes Stand Against Nuclear Tests

WINNIPEG (CP)—The Canadian Labor Congress today expressed hopes that there will be no resumption of nuclear tests.

The CLC stand was contained in a statement of President Claude Jodoin.

The labor body executive council is holding closed meetings here prior to a political seminar of CLC and CCP leaders to consider the proposed formation of a new political party built around the CCP.

He proposes, too, to suggest that the Allies co-operate in what he called "one of the most pressing problems of our time"—helping some 2,000,000 people in the less-developed lands improve their culture, health and living standards.

Speed Limit Hike Planned by Ont.

TORONTO (CP)—The Ontario government may raise speed limits this fall to 55 and 60 miles an hour on a number of the province's two-lane highways, it was reported today.

The highway department has recommended the increase in the speed limit by five or

and Pandora about 9:10 a.m. Drivers and passengers were only bruised, but damage was heavy. (See Page 17.) (Times Photo by Bill Halkett.)

THIS WORLD OF OURS**People and Things**

(Times News Services)

WEST HEMPSTEAD, N.Y.—Was the baby-sitter a bookie? Or was the baby a bookie-sitter? Or both? Police pondered.

The baby sitter was no bobby-soxer. He was a 62-year-old grandfather, and the baby was his 18-months-old grand-daughter.

Police noted he took daily walks, always with the baby.

And he seemed always to stop at the same stores.

And he seemed always to greet the same people.

Monday, police said they saw him exchanging money and pieces of paper with commuters at a Long Island Railroad station and booked grandpa — Frank Ferrara — as a bookee.

There was, of course, no charge against the baby.

DUBLIN.—Lester B. Pearson, leader of the Canadian Opposition, has arrived in Ireland with his wife to visit the homes of his forefathers. Pearson's ancestors lived in Dublin and Cork and emigrated to Canada about 100 years ago.

TAIPEI Formosa — Forty women employed by Formosa's state-owned railway went into Taipei district court Tuesday and applied for divorces.

The railway administration has ruled that in the future no husband-and-wife may work for it. The decision was made in an economy drive.

The women who sought di-

Former Sask. Deputy To Be Buried Friday

Funeral service will be held at Hayward's funeral home at 3:30 p.m. Friday for John McIntosh, former deputy minister of municipal affairs for Saskatchewan, who died here Tuesday.

He was 68.

Born in Glasgow, Scotland, Mr. McIntosh came to Canada in 1913 and entered what was to become his life-work in Saskatchewan government service.

He soon rose in the service and became recognized as a leading authority on Canadian municipal affairs. He retired two years ago to live in Victoria.

A gardener and keen ceramist, Mr. McIntosh was an elder of St. Andrew's Presbyterian Church and a member of Victoria Saltire Society, and a veteran Mason.

Surviving are the widow at home, S. Moss; a son, Dan;

two grandchildren in Regina;

a brother, Dr. W. J. McIntosh, in England, and several nephews.

SEATTLE POLIO CASES START RUSH FOR SHOTS

SEATTLE (AP)—King County's polio epidemic has brought a rush to the immunization centres for protective vaccine, the Seattle-King County Health Department reported today.

There were 11,000 immunizations last week—more than 10 times the pre-epidemic average.

Thirty-six cases had been reported through Tuesday for the late-summer outbreak. Seventeen of these were adults, three of them over 40.

The health department reported it believed the epidemic was about at the halfway mark.

Charge Dismissed In Accident Case

DUNCAN — A charge of driving without due care and attention laid against George Creighton Mackay, Mill Bay, was dismissed by Magistrate A. C. Sutton in Duncan police court Tuesday after a plea of not guilty was heard.

Mackay was defended by David R. Williams.

He was charged following an accident on Trunk Road July 27, when his vehicle was hit by a car driven by Joseph Ceriko, Deerholme. Each car suffered about \$250 damage.

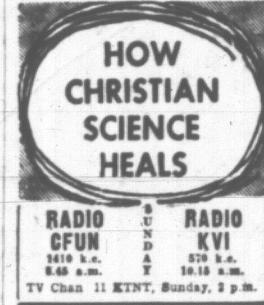

Ceriko told the court that Mackay had travelled on the gravel portion of the right side of the road.

"I figured he would edge out on the highway, so I stayed behind him until he stopped," Ceriko said. He pulled out to pass and that Mackay swung in front of him.

Mackay insisted that his turning signal had been showing a left turn.

"I was on the blacktop. I don't travel on the gravel," he said.

RCMP Constable acting for the Crown told the court how the vehicle of the accused had

been hit on the left front door. This indicated Mackay had been either in the wrong lane for a left turn, or on the gravel portion of the road, he said.

"It was an unfortunate accident, but I can't see that this man is to blame at all," Magistrate Sutton remarked before dismissing the case.

Ship Official Dies

SEATTLE (AP)—Raymond C. Anderson, 63, executive vice-president of Alaska Steamship Company and inventor of the laminated ski, died Saturday night of a heart attack.

He held patents on the laminated ski and collected royalties on the use of his invention for 17 years.

The Great Salt Lake of Utah is about six times saltier than the ocean.

Last Tributes Paid Island Polio Victim

DUNCAN — Funeral services for Mrs. Marguerite Elizabeth Gibbs, 23, B.C.'s first polio fatality this year, who died in a Victoria Hospital Saturday, were to be held at Hirst funeral chapel today at 2 p.m.

Rev. Canon Brian T. Page was named to officiate with interment in the family plot at Mt. View cemetery at Somenos.

Born in Duncan, the late Mrs. Gibbs is survived by her husband, Staff Sergeant William L. Gibbs, a radar electronics technician with the U.S. Air Force in Alaska; two sons, Michael and David; a brother, Richard Maurant, Duncan; parents, Arthur E. Maurant of Victoria and Mrs. Esther E. Maurant of Duncan; and two sisters—Mrs. V. Erickson of Duncan (also suffering from polio) and Miss Susan Maurant of Vancouver.

He died at Ganges last week. Surviving are the widow, Mabel, and one son, Ernest, Lake Cowichan; five grandchildren, and sisters in Burnaby and Port Angeles.

China Lowers Targets In Economic Program

HONG KONG (Reuters) — local conditions because of a shortage of farm labor.

The committee reported that the Chinese economy continued its "leap forward" during the first half of 1959.

In view of achievements last year and in the first half of 1959, it would be possible to fulfill by the end of this year the main targets for major industrial and agricultural products originally fixed for 1962, the last year of the second five-year plan.

The communiqué, reported by the New China news agency, was issued following a plenary meeting of the central committee under party leader Mao Tse-tung at Lushan, in Kiangsi Province, from Aug. 2 to Aug. 16.

The committee decided that the four main targets for 1959 — steel, coal, grain and cotton — should be readjusted.

FARM LABOR SHORTAGE

The communiqué also appeared to put a clamp on the production of steel by peasants in crude backyard smelters. It suggested that the production of steel by local methods should be determined by local authorities in accordance with

BIGGER CROPS

Although several areas had suffered from severe flooding and drought, the average summer crop yields all were greater and the total crop of wheat, early rice and grape-seed was bigger than last year's bumper harvests.

For a time certain commodities had been in rather short supply because the purchasing power of the people

had increased even more rapidly than the volume of retail sales, it said, but the supply situation now had taken a turn for the better.

The communiqué said the rural people's communes had taken firm root and were demonstrating their advantages.

RIGHTEIST DANGER

The principal danger to the achievement of another leap forward this year lay in the growth of "right opportunist ideas among some cadres," the communiqué said.

These cadres underestimated the people's great achievements in the "leap forward" movement and in communes "and over-emphasized the seriousness of certain defects which occurred in the two movements owing to lack of experience and which have been overcome quickly."

The communiqué expressed full support for the efforts made by the Soviet Union at the Geneva foreign ministers' conference and welcomed the forthcoming Eisenhower-Khrushchev exchange of visits.

The communiqué stated that in the first half of 1959 total industrial output was greater by 65 per cent and the volume of rail freight was greater by 49 per cent than in the corresponding period of 1958.

HOPE FOR A LITTLE CAMPAIGN MONEY

Gov. Earl Long of Louisiana celebrated his 64th birthday today in New Orleans. Long expressed confidence he will be returned for an unprecedented fourth term.

CHESTER TO RETIRE

LONDON (CP) — The Hudson's Bay Company has announced that P. A. Chester, the firm's managing director, retires Sept. 30 after 36 years service with the company.

He will be succeeded by J. R. Murray of Winnipeg, now general manager for Canada.

JOINT PROBLEM

Hydro needs joint development between Alaska and B.C., he said. In several instances, large potential power developments straddle the joint boundary, the watersheds in B.C. and the Yukon and the "natural point of maximum power development lies near tide-water."

Gov. Egan spoke to an "Alaska Day" luncheon marking the close of a busy three-day convention at this site of a multi-million-dollar aluminum plant.

In the final business sessions Tuesday, Richard Downing, Alaska's commissioner of public works, said an \$18,000,000 ferry service Prince Rupert to Haines, Alaska, is being planned, along with new roads to link with Canadian highway systems.

The governor said that also under consideration on the national level "are possible

"It is quite evident that additional means of access through the Alaska Panhandle are needed for access from Alaskan coastal cities to the interior highway system and as an outlet for raw materials from B.C. and the Yukon to tidewater shipping points within reasonable distance of their source," Gov. Egan said.

"The state of Alaska is pre-

pared to plan such development in co-operation with its Canadian neighbors, and is in a position to select the lands necessary for the establishment of the required port facilities and attendant communities."

He said the actual location of such access route through the Panhandle would depend on the distribution of the B.C.-Yukon resources which must be transported to tidewater shipping points for successful utilization.

Dollars Don't Weigh Fish

THE SHRUM COMMISSION. having reviewed the high cost of efforts to protect fish in the Ash River development, has presented an interesting opinion on the old fish-or-power controversy.

Figures cited in the report show that the costs, per fish, on the Ash River were uneconomical. Similarly, comparable work on other proposed Island hydro-electric projects threatened to be so expensive that the undertakings have been shelved.

The Shrum report cites the suggestion of the B.C. Power Commission, "that there should be some independent authority, rather than one of the directly interested groups, to resolve the problems of fish and power, and that this authority should take into account the economic value of the two resources."

The Shrum commission found "much merit in this suggestion, and that it is unwise to continue the assignment of final authority and control over the use of streams and rivers to any one agency" whose prime interest is one type of commercial or recreational use of the waters."

"Besides fishery and power interests," the report notes, "there are also recreation and, in some cases, flood control and irrigation considerations associated with the management of water resources."

Certainly the points noted by the Shrum report should not be overlooked. But there are at least two elements that deserve more consideration than has apparently been given to them.

Proud Story

DR. NORMAN MACKENZIE has marked the Golden Jubilee of the University of British Columbia's charter by detailing some important education history in this province.

What he has presented is an impressive record of achievement. Such reports inevitably deal with the efforts of founding fathers, of legislation to establish the university, of site selection, construction of buildings and the growth of student bodies.

That is included in Dr. MacKenzie's annual statement. But captured in it also is the spirit of 50 years' pioneering and effort that have made the University of British Columbia big, and placed it on the road to greatness.

"Compared with some universities," says the president, "we are very young indeed, but if what has been done in our first 50 years is any portent for the future, we may look forward with confidence and with pride."

Of course the university faces problems, pressing problems of finance. It always has. In the past they have been met, often through improvisation, and undoubtedly they will be in the future and for a traditional reason:

Good News for Britain

BRIGHT NEWS COMES FROM Britain where the Treasury's August bulletin reports what amounts to a flying start toward prosperity.

Industrial output is going up. Employment has risen. Unemployment has fallen. Exports are increasing. And, more significant, there has been a marked rise in output per man during a time of expansion.

This, says the Treasury, citing higher gold reserves, more personal spending, greater sale of automobiles and a small drop in consumer prices, promises to improve as the year goes on.

The story is far different from that issuing from Britain when Prime Minister Macmillan took office, applied his tough policies and joined with his countrymen in a move toward austerity.

The Treasury, however, issues a warning with its glad tidings. To maintain this fast-paced drive to national prosperity the country will

Fame and/or Fortune

THE ASTRONOMICAL SUMS recently offered and won in United States radio and television quiz shows—and the ensuing scandals arising from charges of collusion—contrast dramatically with a similar show on the BBC.

A recent BBC release says that the "What Do You Know?" quiz contest for this year was won by a Lancashire doctor. He received the title "Brain of Britain" and then defeated previous annual winners to gain the title "Brain of Brains."

But the title was just about all he got, aside from the honor of meeting further challengers during the year. For knowing the maxi-

In the first instance, attempts to find a solution to the fish-and-power problem are still in the experimental stage. Ideas are being tried out. Many of them will prove unsuccessful and when research ends in proving an idea fallacious, the costs of the research—not compensated by direct returns—rungs high.

It may still be costly to look after the fish in streams and rivers where power development is undertaken even when an adequate system to protect fish has been found. It is obviously less rewarding when experiments fail to produce a solution.

The second point that needs more consideration concerns the evaluation of economic returns from fish or power and its influence in determining priority. In any number of cases in this province a decision based on economic returns would be overwhelmingly in favor of power.

But the argument has yet to be met that dollars take the place of food—and fish is food. A society which destroys food sources invites hunger—and it has yet to be proved that hydro-electric development, on the Fraser, for instance, with improved irrigation made possible through an abundance of electrical energy, would produce sufficient beef and enough in crops to compensate for the loss of an established fish run.

The Shrum commission findings on fish and power will not be ignored. They do not, however, appear to have advanced the solution of the fish and power problem.

NO PLACE TO HIDE IT

A-a-a-ny Old Rags, Bones, Strontium-90?

THE controversy over radioactive poisoning continues. No sooner does some committee agree that the whole danger is highly over-rated than someone else gets up and reveals statistics that send activated shivers down the spine of the poor layman.

Expert A says Yes; Expert B says No; Expert C says Maybe. Joe Doakes can only wonder which one to believe. He has a certain interest in the question: after all, it's his life they're talking about—his and his descendants!

Will Joe Doakes VII have two heads, and fins instead of hands?

Will he be laughed at because all his playmates have three heads and no hands at all? Are humanity's genes already undergoing changes which will produce something even more freakish than we are now?

Tobin

into the problem of where to dispose of nuclear wastes. It seems the atomic garbage business is going to be big again. Any young fellow starting out in life today might well give it a thought as a possible career. With radioactive wastes staying hot for thousands of years there'd be no danger of his job petering out on him.

Mr. Roedder figures that by the year 2000 the United States will have piled up 16 million tons of atomic by-products—useless, expensive, deadly dangerous and indestructible.

Dusty Death

As to the Strontium 90 which is produced by nuclear fission and which already has become a source of worry to a good many people such as people who eat bread made from wheat, people who drink milk from cows that eat grass, people who eat beef from steers that graze on open meadows, people who breathe, and so on—Mr. Roedder has a few cheery words.

Just one gram of Strontium 90, eventually spread, could poison all the water drunk by mankind in a year to twice the tolerance levels approved by the U.S. Atomic Energy Commission. Just one gram—about a thirtieth of an ounce—and our drinking water all over the world would become a cup of death.

That even beats the eight ounces of biological poison which Sir Robert Watson-Watt says could wipe out all the race of man if properly distributed. We're making progress all the time.

But another report plunges us back into depression again. Things are even worse than they really are.

A Mr. Edwin Roedder, described in The New Republic as "a U.S. geological survey expert," has been asked to look

all that waste material that will be throwing off deadly rays. As he says, four years from now the U.S. alone will have 16 million tons of it.

It's been suggested that it be stored underground in mammoth caves. But Mr. Roedder says this wouldn't work. It could seep into the ground and contaminate water which later would come to the surface. It would have to seep somewhere if the cave was not to become filled, but chemical action would eventually seal up the porous rock and thus still more caves with the ideal qualities would have to be found. Not good enough, says Mr. Roedder.

Instead he proposes that concrete cisterns be built underground, measuring about 1,600 feet in diameter. One this size would hold two years' supply of radioactive wastes. When it was filled up another would have to be built. That looks like steady work for the construction industry.

Old Faithful

One of the disadvantages of this system of disposal, it is pointed out, is that heat from underground reaction might produce a geyser of radioactive steam which could spew into the atmosphere and make that part of the earth uninhabitable. But that's a risk we'd have to take. We should be used to living on top of powderkegs by that last fall.

The banks had been selling government bonds at sacrifice prices to raise money for continued lending. But there was a limit to such a procedure and the chartered banks now would have to curtail their lending policies, the statement added.

The result has been a rationing of loans by the banks across the country. Mr. Fleming commented that if such a condition continues for an extended period, it could slow down the economic pace. But he expressed the hope the situation is only temporary. There is evidence that the Bank of Canada feels the same way.

The latest Bank of Canada statistics show that the money supply totalled \$13,380 millions on Aug. 12, a decline of \$22 millions from Aug. 6 but an increase of \$380 millions from Aug. 13, 1958.

The present money supply is about four per cent higher than a year ago and 17 per cent higher than two years ago. It took a jump of about \$1 billion between June, 1958, and last October. Since then it has remained relatively steady, reaching a low point of \$10.75 millions Feb. 13.

The cash reserve position of the chartered banks was slightly improved last week, however, over the previous week. This was accomplished by a net increase of about \$33 millions in Bank of Canada holdings of Government securities, bringing the ratio of chartered bank reserves to their deposits to 8.1 from 7.9 per cent.

Cash Reserves

The Bank Act requires chartered banks to keep cash reserves equal to at least eight per cent of their deposits, averaged over a month.

Buying up Government securities which the Bank of Canada then buys from them, cash reserves of the chartered banks increase, since the central bank pays for the securities it buys by creating the necessary money.

It issues a cheque for \$1 million worth of Government bonds from the Bank of Montreal, for example. The Bank of Montreal deposits the cheque at the Bank of Canada and thereby increases the chartered bank's cash reserves in the central bank by \$1 million.

The Bank of Montreal then is in a position to lend more money to its own borrowers. And thus the process of increasing the general money supply is completed.

In effect, every new chartered bank loan is an increase in the money supply by its amount, and each bank loan repaid is a decrease by its amount.

There is no reason to believe the chartered banks want an increase in the six per cent statutory limit on their lending rate.

The bankers' association statement gave no indication of such a desire and later James Muir, chairman and president of the Royal Bank of Canada, issued a statement saying neither the association nor any member bank has sought to increase earnings by asking for a rise in the interest ceiling.

Parliament's Job

At any rate, Mr. Fleming said earlier last week that the government was giving no thought to such an action. It would be something only Parliament could do anyway.

He also told a Canadian Press reporter that he believes the effect of the treasury bill rate has been "greatly exaggerated" lately. There had been nothing like the movement in the treasury bill rate in prices of other Government bonds.

On the final day of the last session of Parliament, July 18, Mr. Fleming was asked by Opposition Leader Pearson to comment on a rise of \$137 millions in the money supply from the 1958 peak last Oct. 1. The inevitable result, said Mr. Pearson, of a continuing rise in the money supply would be inflation.

Mr. Fleming said then "it has been made quite clear by the Bank of Canada that it has no thought of embarking upon an increase of money supply under existing conditions."

—Barron, Victoria Daily Times.

The Money Supply

By DON PEACOCK
Canadian Press Staff Writer

This is the second of two articles explaining the background of today's high interest rates and the predicament of government and banks. Yesterday's article discussed the market for treasury bills.

A FAR-REACHING possibility arising from inflation is that when the current boom has run its course the inflationary factor might make more severe any recession that follows.

By keeping the lid on the money supply, the Bank of Canada and the Government hope the current situation will level off on its own.

Higher interest rates should encourage more saving. This eventually should make available more funds for loans. Money should gradually loosen up—that's the theory, at least.

Also, as the economic advance improves, Government revenues should improve too. The Government shouldn't have to borrow so much money then, thus leaving more funds available for other borrowers.

The chartered banks, although holding certain reservations about the present situation, have made no demands for any immediate, substantial increase in the money supply, well-informed sources say.

The Canadian Bankers' Association did, however, issue a statement Aug. 13 pointing out that the yield on treasury bills has risen to current levels from 3.25 per cent last Jan. 8.

The current bank rate compares with the all-time low of 1.12 per cent on Aug. 2, 1958.

The bankers' statement pointed out that the bank rate of 6.41 per cent on Aug. 13 was well above the statutory maximum of six per cent the chartered banks may charge their borrowers. It also referred to the sharp increase in the demand for money without a corresponding increase in the money supply, a situation that began last fall.

Sacrifice Prices

The banks had been selling government bonds at sacrifice prices to raise money for continued lending. But there was a limit to such a procedure and the chartered banks now would have to curtail their lending policies, the statement added.

The result has been a rationing of loans by the banks across the country. Mr. Fleming commented that if such a condition continues for an extended period, it could slow down the economic pace. But he expressed the hope the situation is only temporary. There is evidence that the Bank of Canada feels the same way.

The latest Bank of Canada statistics show that the money supply totalled \$13,380 millions on Aug. 12, a decline of \$22 millions from Aug. 6 but an increase of \$380 millions from Aug. 13, 1958.

This was accomplished by a net increase of about \$33 millions in Bank of Canada holdings of Government securities, bringing the ratio of chartered bank reserves to their deposits to 8.1 from 7.9 per cent.

Confused

In your reply to Mr. R. J. Pring's letter you say that although the province's direct debt has been liquidated it has been replaced by an indirect debt which now totals almost half a billion dollars and must, with interest, be paid off, by the people of B.C.

Do you mean to imply that Mr. Bennett has borrowed this money to pay off the direct debt? Have we no assets to balance these contingent liabilities?

Will not the interest on these contingent liabilities be paid by the people who use the services furnished and not by the provincial taxpayers as a whole?

Goodness knows, many people are confused on this subject, and the editorials and articles in the Times, it seems to me, only try to add to that confusion.

ACCOUNTANT.

From Our Files

Aug. 26, 1899 — Vancouver: Owing to the bursting of a water main, which flooded the cellars of business places on Hastings, a series of damage suits against the city are likely to ensue.

The bankers' association statement gave no indication of such a desire and later James Muir, chairman and president of the Royal Bank of Canada, issued a statement saying neither the association nor any member bank has sought to increase earnings by asking for a rise in the interest ceiling.

Parliament's Job

At any rate, Mr. Fleming said earlier last week that the government was giving no thought to such an action. It would be something only Parliament could do anyway.

He also told a Canadian Press reporter that he believes the effect of the treasury bill rate has been "greatly exaggerated" lately. There had been nothing like the movement in the treasury bill rate in prices of other Government bonds.

Mr. Fleming said then "it has been made quite clear by the Bank of Canada that it has no thought of embarking upon an increase of money supply under existing conditions."

UN CORRESPONDENCE

By STANLEY BURKE

A Slippery Slope?

NEW YORK—At a critical, fast-moving time in international affairs, the United Nations is on the sidelines and some people are wondering if the organization might be on the "slippery slope."

This phrase was used by a senior member of the secretariat staff, who noted in a conversation that the UN is not involved in any of the major international issues today—the thaw in the cold war, disarmament, the Caribbean crisis, Berlin.

The only place where it seems the UN might be called upon is in Laos, and this is far from certain.

Is this a temporary lull or is the UN slipping into limbo, following the League of Nations, fulfilling prophecies made again and again over the past 14 years?

No one I've spoken to at the UN is willing to try to answer this question, although they have indulged in interesting speculation. But before this question can even be discussed it's necessary to try to decide what the UN is and what it should accomplish. You can't say that an organization is a failure unless you know what it's failing to do.

What is the UN? This isn't easy to say. One answer might be that it is a diplomatic clearing house, a mere convenience for a group of sovereign nations. It's more than this, however.

It's something which is supposed to "save succeeding generations from the scourge of war," and, although this isn't written into its charter, millions of people feel that somehow it should provide a form of central authority to limit the power of the sovereign nations.

The nations have acted like medieval barons, recognizing no check on their authority, interested primarily in endless warring upon one another. People felt this should stop.

The result was what you might call the "First United Nations" which was created

Burke

at San Francisco in 1945. It was, of course, based upon the assumption that the five major powers, working in co-operation, could maintain peace through the Security Council.

Even if the Russians had been willing to co-operate in this, it's questionable if it would have worked. The UN in those days was less than half its present size with small Afro-Asian representation.

★ ★ ★

In spite of the idealistic spirit which permeated it, it was essentially a White man's organization. Today the Afro-Asians are overwhelmingly the largest group, and it's hard to imagine that they, and the other smaller nations, would have submitted to domination by the Big Five.

At any rate, practical in concept or not, the Russians made sure it wouldn't work. The UN didn't die, however. Instead it evolved into what might be called the "Second United Nations" in which the General Assembly, the parliament of the small nations, became dominant.

Even in the Assembly, however, the chill of the cold war hampered operations. Attempts were made to transform almost every major topic into a cold war issue.

Now, however, the cold war may be moderating and this will present the world and the UN with an entirely new situation. If the United States and Russia decide to co-operate, will the result be a re-establishment of the Security Council? Some people think this is possible. Others, and I think this includes most Canadians, are inclined to think that the result would be more likely a "Third United Nations."

★ ★ ★

Just what this "Third UN" might be is, of course, impossible to predict. It's a good guess, however, that it would include in its membership a troublesome, arrogant young China, which more conservative, older nations like Russia would try to check. And, it's a good guess that there will be more emphasis on the economic and social activities which the cold war choked off.

It may well be that, if cold war tensions ease, the UN, far from dying, will be able to get ahead with more useful tasks.

By WALLACE REYBURN

Charge-It Phone Calls

LONDON—Most welcome news that frustrated telephone users have had in a long time—the "charge-it" scheme that the post office is introducing for public phone booths. Constantly, they've been irritated by the difficulty in getting pennies for a call (four of them in the slot call).

Pestered shopkeepers in the region of a booth have taken to putting notices in their windows: "No pennies for phones."

Soon any subscriber will be able to use a public phone and have the call put down on his account, secret code numbers preventing anyone from having a free call at your expense.

Question answered: Which is the fastest living creature on earth? Record is held by the spine-tailed swift. Clocked in India, it was two miles in 36 seconds, an average of 200 mph.

Question still unanswered: When I saw in a quiz the question: "How did the bikini get its name and what's its connection with atomic bombs?" I thought here at last I would solve something I've always wondered about why that style of bathing costume got that name.

But the answer was: "The bikini is named after a tiny island in the Pacific where postwar A-bomb tests were carried out." Sure sure, but why? Does any reader know?

Makarios Calls New Cyprus Talks

NICOSIA, Cyprus (Reuters)—Archbishop Makarios summoned a special meeting Tuesday of the Greek-Cypriot consultative assembly to discuss the current constitutional crisis between Greeks and Turks.

GOV'T PLANS NO PROBE INTO FISHERMEN'S UNION

VANCOUVER (CP)—Labor Minister Wicks said today that there will be no investigation by the British Columbia government of the United Fishermen and Allied Workers' Union (Ind.).

Spokesmen for a fishermen's committee at Kyuquot, on the west coast of Vancouver Island, said this week the minister promised an inquiry into the union's administration.

The committee has complained that the union is Communist controlled and that it is not being run "in the best interests of labor or of Canada."

Mr. Wicks, in a telephone interview from Cranbrook, said today he probably told the Kyuquot people in a routine way that his department would look into the matter. He said "that's standard procedure."

Asked if he planned an investigation, Mr. Wicks said: "Not at the moment. This is a sort of witch-hunting position and the government doesn't go for that."

ACROSS THE PROVINCE

Yellowhead Car Cavalcade Ends 800-Mile Trip

(From CP Dispatches)

VANCOUVER—The "Yellowhead Overlanders '59" roared into Vancouver in a 51-car motorcade late Tuesday.

It was their last stop in a hectic 800-mile journey from Edmonton, promoting a highway link connecting the Prairie city and the Pacific coast through the Yellowhead Pass.

The caravan was led by Mayor William Hawrelak of Edmonton. It left Edmonton, with 62 cars, picked up 32 more in Jasper and finally arrived here carrying more than 200 people.

Mayor Hawrelak will meet Prime Minister Diefenbaker in Ottawa Thursday with his proposal for a southern extension of the Trans-Canada Highway from Jasper to Kamloops, with a 60,000-name petition as ammunition.

BOY KILLED
KAMLOOPS—Robert Lamb, 11, was fatally injured Tuesday night when the bicycle he was riding was in collision with a three-ton truck owned by the municipality of North

Kamloops near the North Kamloops bridge. The boy died a few minutes after arriving at hospital.

SEARCH ABANDONED

KAMLOOPS—Police have called off the search of dense bush country east of here for Roy Chapell who was last seen Aug. 8 until a new lead turns up.

RCMP Cpl. Ken McHale of Chase, who spent the last six days on the search, said Tuesday "there's nothing more we can do until a new lead turns up."

Chapell entered the woods with a friend. They parted and went to rendezvous later. Chapell never turned up.

REMAND IN SHOOTING

HOPE—Martin Willoughby, 19, was remanded for a week without plea when he appeared in magistrate's court Tuesday on a charge of attempted murder in connection with an August 16 shooting incident on the nearby Katz Indian Reserve.

Willoughby, sought by police throughout British Columbia for more than a week, was arrested Monday night when he stepped from a bus at Squamish, 35 miles northeast of Vancouver.

The youth was charged with attempted murder of Peter John, 19. Police said a bullet fired from outside the window lodged in the mattress of a bed on which John was sleeping. Shots earlier were fired at a CPR diesel train and a CPR section house in the same area.

UNION "WARFARE"

VANCOUVER—Summons charging three members of the Seamen's branch of the Canadian Brotherhood of Railway, Transport and General Workers (CLC) with assaulting a member of a rival union were issued here Tuesday.

Ronald Colby, a member of the Seafarers' International Union, said he was attacked by four men in a Vancouver beer parlor Saturday night.

Colby said he identified the men as former SIU members who joined the Brotherhood.

The two unions are engaged in a jurisdictional battle on the west coast.

BIG CONTRACT LET

VANCOUVER—A \$7,295,582 contract has been awarded to Perini Pacific Limited for construction of the main river piers on the Port Mann bridge at Coquitlam, 20 miles east of Vancouver.

The four-lane bridge will connect with the new Trans-Canada Highway and link with the Second Narrows Bridge currently being built across Vancouver Harbor.

FOR QUADRA

\$165,270 Low Tender On Ferry

Allied Builders, Ltd., of Vancouver, submitted the low tender of \$165,270 for construction of a car ferry to serve Quadra Island from Campbell River, according to the highways department.

Tenders for the 110-foot, six-car vessel were opened Tuesday, and now are being studied by department officials prior to letting a contract.

Others were: John Manly, Ltd., New Westminster, \$159,656; Victoria Machinery Depot, \$213,909; Burrard Drydock Co., Ltd., North Vancouver, \$213,315, and Yarrows, Ltd., Victoria, \$219,203.

Qualicum's Golf Entries Pouring In

QUALICUM BEACH—Entries are coming in rapidly for the annual Labor Day tournament to be held at Qualicum Beach Golf Club Sept. 5 and 7, according to committee chairman R. H. Hodgson.

He advised early registration, because only 88 entries will be accepted for the week end, and the list will be closed if it exceeds that number.

Qualifying rounds will be played Sept. 5, and the finals on Labor Day.

Men's division champion last year was Al Reside of Uplands Golf Club in Victoria. Ladies' champion was Mrs. Jeannette Forrester of Qualicum Beach.

Adequate Parking for Tenants Must for Saanich Apartments

A bylaw requiring all new apartments in Saanich to provide adequate parking facilities for their tenants, was approved by council's lands and planning committee at a meeting Tuesday.

But the bylaw met stiff opposition from Couns. Leslie Passmore and Joseph Casey who did not see the necessity for imposing restrictions on apartments anywhere in the municipality.

The bylaw to be submitted to council for final approval is similar to the ones in effect in Victoria, Oak Bay and Esquimalt.

Basically it calls for 100 percent parking space for tenants in apartments. Backyards must be 40 feet in width to allow for adequate loading and unloading space. Buildings must also be set back 25 feet from a street, the same frontage required of all private dwellings.

ONLY TWO SO FAR

Coun. Leslie Passmore said he did not see the reason for

WINNERS of western pleasure horse class at Nanaimo gymkhana were "Spats" and his owner, Helen Stratford, 14, of Victoria. Miss Stratford is the daughter of Capt. and Mrs. Harold R. Stratford, 3930 Cumberland. (George Molecey Photo.)

Council Studies Working of Own Forest Reserve

NORTH COWICHAN—A proposal by Reeve C. A. Murison that the municipality develop and operate its 9,000-acre forest reserve as a tree farm on a sustained-yield basis is being studied by council.

Reeve Murison emphasized that the project would be a long term one, but estimated that the aggregate net yield over 100 years would be in excess of \$1,000,000.

His recommendations, contained in a lengthy brief, ruled out two other methods suggested for developing the reserve and previously studied by council.

The reserve comprises approximately 9,000 acres in three main blocks, including about 700 acres of timber 70 years of age and over. The balance, with the exception of about 300 acres which are not reproducing satisfactorily, is young timber, the bulk being under 25 years of age. It is mainly fir with some cedar, hemlock and deciduous growth.

Site factors indicate it is capable of being brought to a sustained yield on a 70-year rotation. Owing to the uneven grouping by age, strictly limited cutting will be necessary over the first 30 years in

"After the first seven years, small dividends should become possible and these will gradually increase during the 70-year rotation cycle."

Long Lease to Big Firm Considered

It is estimated that the aggregate net yield over 100 years would amount to \$1,013,000.

Reeve Murison noted that the municipality had investigated two other methods of developing and operating the reserve on a sustained yield basis.

These were to give a long-term lease of 99 years to one of the two great forest industries with which the municipality was closely associated, or have the Reserve managed under contract, by one of the same two firms.

After nearly four years of study and negotiation, Reeve Murison said he had no hesitation in recommending that the municipality undertake the management of its own forest reserve.

He said that acceptance of his recommendation would entail (a) the preparation of a long-term plan covering access roads, forest protection and improvement, harvesting and re-forestation; (b) drawing up an annual logging, thinning and construction program; (c) the engagement on a part-time basis of a suitably qualified forest manager to undertake the work of developing, operating and supervising the tree farm under direction of council; (d) financing of the tree farm under a special account from which the cost being met from receipts from sales.

In concluding his brief, Reeve Murison said it would be a long-term project "from which neither this council nor many succeeding councils, nor this generation of ratepayers, can expect to derive financial benefit. I do suggest, however, that it is a project that will benefit future generations and that we owe it to those generations to embark on the development of an asset to which we have fallen heirs so that it may yield the maximum benefits at minimum risk."

Gas Station Site Control Sought

But Request of Town Planners Rejected by Saanich Committee

A Town Planning Commission recommendation that would have given Saanich council some control over gasoline stations sites in residential and commercial areas, was turned down by the lands and planning committee Tuesday.

The vote was four to three against the recommendation.

But at the suggestion of Reeve George Chatterton, the committee approved the preparation of a bylaw which will require all future service stations to provide adequate access and sufficient parking facilities.

The commission urged council to pass a bylaw which would require service stations to submit their zoning applications to council for consideration and approval.

This would give council a say in the location of a service station site.

Under the present set-up

service stations can be constructed in any commercial zone:

This sometimes has given rise to problems, especially in residential areas where properties occupied by small stores have been bought for service station use.

The bylaw would have also permitted council to curb construction of gasoline stations on sites likely to create traffic hazards.

Reeve Chatterton who supported the commission's recommendation said the bylaw would not hamper the construction of service stations, except in exceptional cases.

Gas Firm Official Has No Objection

"It is not designed to stop or restrict construction of service stations," he explained. "It just gives us some measure of control, which incidentally we have been exercising for the past six years without by-law."

Supporting the reeve's views, Coun. Harold Todd said he favored a bylaw as it would give property owners in a residential district a say as to whether they wanted a gas station or not.

Coun. Stanley Murphy said a bylaw would enable council to check ribbon development on major arterial highways.

TRAFFIC FINES

In city police court Monday: John Wesley Robbie, 1143 Colville, \$35; Steve Kowalchuk, 1617 Belmont, \$35; Robert Russell, 216 Michigan, \$40 and license suspension, for careless driving.

Beverley Mugford, Langford, \$20; John S. Damaard, 3871 Cadboro Bay, \$20, for speeding over 30.

Hilton Earl Jenkins, 1153 Fort, \$25 for speeding over 30. In Colwood RCMP court Monday:

Margaret Judith Greenfield, 232 Richmond, \$35 and \$3 costs for following another vehicle too closely.

Victoria Daily Times WED., AUG. 26, 1959

Airman's Coolness Saves Soldier Stricken on Plane

McCHORD AIR FORCE BASE, Wash. (AP)—The story of how two young United States Air Force personnel kept a stricken man alive high over the Pacific by carrying out treatment prescribed by a physician 1,000 miles away was told here Tuesday.

Maj. Clarence Molder, a pilot stationed at McChord told the story after his return from Tokyo in what had begun as a routine flight.

His big C118 Liftmaster took off from Wake Island Friday and was cruising at 15,000 feet over the Pacific when Airman Second Class Darman Young noticed an army man near him suffering from some sort of seizure. He was rapidly turning blue in the face, and was having difficulty breathing.

NO DOCTOR

"We were 1,000 miles from Hickam Field (Hawaii) at the time," Maj. Molder said, "and there wasn't a doctor on board. But somehow Young seemed to know what to do first. And that probably was the most important thing."

Young called his commanding officer, Molder, and Airwoman Mary E. Ladd to help. They dug into the army man's belongings and found his medical history.

First pilot Capt. Robert Mer-

Esmond Butler Asks Posting in Ottawa

OTTAWA (CP)—Esmond Butler, 36, has expressed the desire to join the northern affairs department after completing his duties as assistant press secretary at Buckingham Palace, it was learned Monday.

icle contacted Hickam and got hold of Capt. A. W. Cranson, a physician. The doctor sized up the situation and then started in with detailed instructions.

PLANE DROPPED

He told Molder to drop the plane down to 5,000 feet. Then he told Young how to dislodge the patient's tongue which was stuck in his throat.

Then came play-by-play commands on how to keep the

patient breathing. Young cleared the windpipe and the esophagus. When the plane set down at Hickam the soldier's recovery apparently was already under way.

"When you write this up," Maj. Molder said today, "I want you to be sure to give all the credit to Airman Young and Airwoman Ladd. They were wonderful. Cool and sensible, and knowing just what to do."

NIKITA GETS INVITATION TO CHURCH

SAN FRANCISCO (AP)—The Episcopal Anglican Bishop of California Tuesday invited Soviet Premier Khrushchev to attend services at Grace Cathedral here Sept. 20. Right Rev. James A. Pike cabled the Russian premier that Theodore Brown, a layman and assistant director of the AFL-CIO civil rights department would be the preacher.

PREMIER BENNETT
... he believes.

DR. BROCK CHISHOLM
... he doesn't.

'NOTHING PERSONAL'

No Santa Claus ... No Position

Premier Bennett and Dr. Brock Chisholm both have strong views about Santa Claus—now only four months away.

"I believe in Santa Claus; Dr. Chisholm doesn't," the premier said Tuesday. "He only believes what he can see. He doesn't believe in those mighty unseen values which exist in the universe . . ."

"These are the spiritual values and they are greater than all the material development that is going on around us today."

"When people jibe at the

spirit of Santa Claus, and all that it symbolizes, I cannot understand their point of view."

"The great forces in the world today are the unseen forces . . ."

The premier made this statement when a reporter suggested that, as his government is employing so many "big names" among its boards and advisers, it should perhaps employ Dr. Chisholm, former director of the World Health Organization, who now lives at Sooke.

"We differ on basic philosophies," smiled the premier, "but there is nothing personal in this. I have never seen Dr. Chisholm."

"I came here because I thought the question to be debated was more serious than it actually was," he explained.

After the recommendation was turned down, an official of a gasoline station provided the debate with an anti-climax.

I think council should take a look as to where gasoline sites are to be located," he said. "I'm not against it."

"The great forces in the world today are the unseen forces . . ."

The premier made this statement when a reporter suggested that, as his government is employing so many "big names" among its boards and advisers, it should perhaps employ Dr. Chisholm, former director of the World Health Organization, who now lives at Sooke.

"We differ on basic philosophies," smiled the premier, "but there is nothing personal in this. I have never seen Dr. Chisholm."

"I came here because I thought the question to be debated was more serious than it actually was," he explained.

After the recommendation was turned down, an official of a gasoline station provided the debate with an anti-climax.

I think council should take a look as to where gasoline sites are to be located," he said. "I'm not against it."

"I came here because I thought the question to be debated was more serious than it actually was," he explained.

"I believe in Santa Claus; Dr. Chisholm doesn't," the premier said Tuesday. "He only believes what he can see. He doesn't believe in those mighty unseen values which exist in the universe . . ."

"These are the spiritual values and they are greater than all the material development that is going on around us today."

"When people jibe at the

spirit of Santa Claus, and all that it symbolizes, I cannot understand their point of view."

ATTACK OF LARYNGITIS PUTS PRINCESS TO BED

LONGREACH, Australia (Reuters)—Princess Alexandra was ordered to bed today with a mild attack of laryngitis and forced to cancel one of the engagements on her Australian tour.

U.K. Honors Heroes of Secret War

LONDON (AP)—The Queen today approved awards to 31 British troops who fought a secret war in the Arabian Desert.

The air-borne task force—175 men of Britain's special Air Service Regiment—flew to

the British protectorate of Muscat and Oman last January. Rebels there had seized a seemingly impregnable position atop 10,000-foot Mount Akdar. They repulsed every attempt by troops of the sultan to dislodge them.

The British force flew in

from Singapore with Lt.-Col. Tony Deane Drummond in command.

"At one stage the ascent was possible only by using ropes."

Britain kept the campaign a strict secret despite Cairo reports of the desert rebellion.

"The war was fought in secrecy and was completely successful," said Deane-Drummond. He won the DSO.

NO TRAFFIC DEATHS FOR 1,095 DAYS

WOODSTOCK, Ont. (CP)—This city of 19,000 has entered its fourth year without a traffic fatality. Chief Constable W. J. Ennis said Tuesday night.

The last fatality on city streets was in 1956. Since then, 1,095 fatality-free days have elapsed.

There's no place like SAFEWAY for RIB ROAST

The combination of things we do makes Safeway Rib Roast a better buy for you

It's Grade Red A Beef—the grade that means top flavor, tenderness, juiciness. We buy nothing less than 'Red' Beef.

PROPERLY AGED. In our own modern meat plant, Safeway Beef is brought to eating perfection by careful aging in special climate-controlled rooms.

TRIMMED BEFORE WEIGHING. A Safeway Rib Roast is just the meaty center portion you see in the picture. We remove the heavy chine bone and replace it with a layer of light-weight fat to seal in juices. We cut off the short-rib section, too. You get a roast that cooks right, carves right, and tastes just wonderful. More good-eating meat for your money.

PERFECT-EATING GUARANTEED. You can't miss with Safeway Rib Roast—or any Safeway meat. We guarantee complete satisfaction—every cut, every time—or your money back without quibble.

Enjoy this finer Rib Roast at our good-value price.

Slide Rolled Over B.C. Family

VANCOUVER (CP) — An eyewitness Tuesday said that screams of help were heard after a British Columbia family was hit by a landslide that followed the Montana earthquake Aug. 17.

Henry F. Bennett, 41, of Cottonwood, Ariz., said in a telephone interview the family of Sydney D. A. Ballard of Nelson was asleep in a con-

verted panel truck when the slide hit them in Yellowstone National Park. "My wife could hear them screaming inside the car. She thought they were saying 'Please get help!' but she can't remember for sure now. Their voices weren't very loud. I guess they were hurt bad. Then there wasn't a sound."

A little while after that the (Ballard) car through the water and tried to open the doors. They were jammed. The sides were smashed in. Everything was smashed. She could hear them screaming inside but it was dark and she could not see anything. The water was rising. "Later there wasn't a sound."

OPERATION SATISFACTORY

SIU Takes Beating On Coast

OTTAWA (CP) — Hard-boiled Hal Banks' Seafarers' International Union has been taking a whipping on Canada's west coast.

Informants returning to the capital from British Columbia say that the normally peaceful Brotherhood of Railway, Transport and General Workers (CLC) has been clobbering the brass-knuckle brigade of the Banks union.

The Brotherhood, according to these informants, has picked up about 400 seagoing members the Seafarers were looking for.

It could mean that the SIU, recently outlawed from the main stream of Canadian labor by being thrown out of the Canadian Labor Congress, is finished on the British Columbia coast.

SEAFARERS LOSING

This is part of a muscle-flexing contest going on between the two hefty unions in the East and the West.

The Seafarers have been losing right and left.

The fight could break out anew on the St. Lawrence Seaway, depending on who wants to get tough first. The SIU is strong on the St. Lawrence River and Great Lakes.

The two powerful unions—the Brotherhood has about 40,000 members and the SIU some 12,000—started tangling when the Seafarers began picking on the little Marine Engineers' Union with some 1,500 people.

The unshod United States-born Banks' raiding tactics was that his union was dropped from the CLC for violating the constitution.

FAILURE AGAIN

After being tossed overboard from the CLC, the Seafarers made a pitch on the west coast for engineers, trying to break up a strike of the engineers' union. They lost out on that.

There were charges during this battle that the SIU imported blackjack specialists from the west coast of the U.S., where Banks got his upbringing on the San Francisco waterfront and did a small hitch in San Quentin Penitentiary during his younger days.

However, the immigration department looked into the charges and Immigration Minister Fairclough later reported to the Commons that no brass-knuckle men from the U.S. could be found in Vancouver.

She was really trying, too, because she has been attempting to catch Banks off base for years. When she was in opposition she tried to have him deported. Now, he has Canadian residence, but, thanks to the lady minister, cannot get Canadian citizenship.

On the west coast, the Brotherhood sent out one of its toughest operators to handle the Banks outfit.

He's Mac Carson, Toronto regional representative, who at six-foot-four is able to handle himself in any company including waterfront goon squads.

Between Carson and other Brotherhood organizers, the SIU appears to have been fairly well mopped up there.

The Brotherhood now has applications in for certification as bargaining agent in 13 companies. Once that fight is over, the battle likely will switch to the east.

NO LICENCE NO EXCUSE; HE SHUT IT!

Sandor Kiss, 2206 Belmont, opened his mouth and put his foot in it in city police court Tuesday.

He pleaded guilty to a charge of speeding over 30 miles an hour and the court was told he had been paced driving at 45 to 50.

"Is there anything you wish to say?" Magistrate William Ostler asked.

"Yes. I don't have a driving licence," Kiss said.

You are not charged, fortunately, with that offence. Is there anything you wish to say about this charge?"

"Yes," he said, and after a moment's thought, "No."

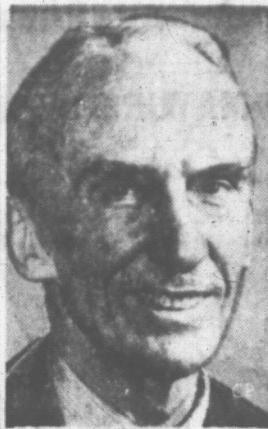

Kiss was fined \$20 for speeding.

SOVIET SCIENTIST'S WARNING

Mass Destruction In Chemical War

PUGWASH, N.S. (CP)—The Russian people believe that use of chemical and biological weapons is incompatible with the demands of humanity and the norms of international law," a Soviet scientist said here Tuesday night.

Prof. Mikhail Dubinin of Moscow's Institute of Physical Chemistry also said that increased scientific knowledge had made it possible for capitalist countries to produce 500,000 to 600,000 tons of poisonous substances annually.

This potential productive capacity gave a "striking idea of the potentialities of chemical weapons and their menace to mankind," he said.

ADDRESSES SCIENTISTS

Dubinin reviewed the potentialities of chemical warfare in his lecture to 25 scientists attending a week-long conference here on chemical and biological warfare.

The conference, fifth-in-a-series initiated by Pugwash-born industrialist Cyrus Eaton in 1957, is being held at Mr. Eaton's "Home for Thinkers."

Scientists from nine countries are attending.

Dubinin said about one-quarter of the casualties suffered by the United States Army in the First World War were due to mustard-gas action. Since that time capabilities of chemical weapons had been increased greatly.

"One large plane with a chemical-weapons payload of 10 tons could wipe out an entire area corresponding to an area destroyable by a medium or large calibre atom bomb," he said.

Roland Walter Barthel, 1601 Esquimalt, \$25 for driving without a licence.

TRAFFIC FINES

In city police court Tuesday:

Robert L. Lester, 3417½ Seymour, \$40; Thomas George Billard, 121 Croft, \$40 and licence suspension, for careless driving.

Vilmos Windisch, 565 Marin Blvd., \$20 for speeding over 30.

Kenneth J. Beckley, Work Point, \$25; Harold Roberts, 833 Admirals, \$20, for driving without a licence.

In Esquimalt police court Monday:

Ronald Emil Burkholder, 912 Dunsmaur, \$30 for speeding over 30 and \$10 for failing to stop at a stop sign.

Louis F. Brassard, 833 Admirals, \$40 for careless driving without vehicle registration plates.

Roland Walter Barthel, 1601 Esquimalt, \$25 for driving without a licence.

Scientists from nine countries are attending.

Dubinin said about one-quarter of the casualties suffered by the United States Army in the First World War were due to mustard-gas action. Since that time capabilities of chemical weapons had been increased greatly.

"One large plane with a chemical-weapons payload of 10 tons could wipe out an entire area corresponding to an area destroyable by a medium or large calibre atom bomb," he said.

SCHOOL DAYS STILL TWO WEEKS AWAY BUT HEADACHES ALREADY HERE

Charter Plane Service Planned

A new charter aircraft company will start operations from Patricia Bay Airport Saturday.

Victoria Flying Services Ltd. will operate under a "C" Department of Transport licence and will conduct "air taxi" services as required, operate a flying school, and repair aircraft.

Principals in the new venture are Bill Sylvester, former owner and founder of B.C. Airlines of which he is still a director; Eric A. Cox, secretary-treasurer who was also associated with Mr. Sylvester in B.C. Airlines, and J. W. Howroyd, co-owner of an airstrip outside Victoria.

Initial investment was \$150,000. The company was incorporated for 200,000 shares at no par value.

Six new Cessna aircraft will form the nucleus of the company's air operations.

Headquarters is in No. 15 hangar at Pat Bay, where floor space has been rebuilt for the repair shop, offices and waiting room.

Aircraft will also be stored by the new firm.

In addition, an "aircraft rental" service will be conducted for the Cessnas, which will take pilot and three customers.

NEW COMMANDING OFFICER of No. 11 Aircraft Control and Warning Squadron at Lac St. Denis, Quebec, is Wing Commander W. J. Smith, 43, of Victoria, RCAF headquarters announced today. W/C Smith relinquishes duties with the Canadian Joint staff in Washington, D.C., to take up his new post. He joined the RCAF in May, 1941, and served as a flying instructor and bomber pilot during the war.

Wreckage Believed Identified Earlier

Search parties at Mount McCreight, near Campbell River, endeavored today to identify aircraft wreckage reported seen on the weekend, and now believed to be of a wreck which was found and fully investigated in 1951.

Ground parties are on the mountain, and at noon today a Piasecki helicopter from VU 33 Squadron, RCN, at Patricia Bay, was trying to find a way to the 4,000-foot level on the mountain through overcast only 800 feet above ground.

Two Neptune aircraft from the United States crashed on Vancouver Island — one in November, 1948, and the other in December, 1950. It was the wreck of the latter which was found the following September, with the skeletons of 11 crew members.

Bodies from the 1951 crash were removed the following year but the wreckage was left at the scene.

When Cpl. W. H. Glover of

the Comox RCAF station reported seeing wreckage while on a fishing trip to Roberts Lake, a ground party was organized.

Air force search officials said a brief radio message Monday night was misinterpreted to mean the party had found the remains of a U.S. Neptune bomber and skeletons of 11 crew members.

In fact, the air force said, the message was a request by the searchers for information on a crash in the area in 1951 of such a plane with 11 men aboard, and the misunderstanding was due to poor reception of the message.

Bodies from the 1951 crash were removed the following year but the wreckage was left at the scene.

Huge Fleet Exercises To Engage 2,300 Men

Chief's Auto Hit Answering False Alarm

A large diving float off Hamsterley beach was to be turned over officially today to Victoria-Saanich beaches and parks committee by officials of the Sidney Rotary Club, led by Victor Dawson.

The diving float was donated by the club as a contribution to the centennial year development of the Beaver-Elk Lake recreational area.

Committee chairman, Ald. M. H. Mooney praised the club at a meeting Tuesday for its assistance.

HAMSTERLEY BEACH FLOAT TURNED OVER

A fire chief's car responding to what turned out to be a false alarm crashed into a light pickup truck, causing an estimated \$1,250 total damage at Cook and Pandora today.

Deputy fire chief Ted Beales, his passenger, fire department secretary Bill Smith, and driver of the pickup, Kenneth M. Beattie, 1236 Oscar, escaped the collision with bruises.

The deputy chief was speeding down from downtown to the Yates Street main fire hall just after 9 a.m., going east on the south half of Pandora, siren and red flasher going.

Police said Beattie was driving north on Cook and had reached about the centre of the intersection of the south portion of Pandora when the fire car struck his truck on the left rear.

Police who attended on the waterfront said the "emergency" was a boy of about 12 on a rubber raft anchored to a kelp bed about 100 yards offshore, jiggling for cod.

Arrival of Det. Sgt. Joseph Armstrong from a Bozeman, Montana hospital is set tentatively for 11 a.m. Thursday.

The Saanich policeman, who was seriously hurt in an earthquake which swept away himself, his family, and possessions on a mud and rock slide nine days ago, is to be flown here by special air ambulance.

Last minute confirmation will be awaited before the flight is scheduled in the event of poor weather forecasts. The trip is expected to take four hours and cost about \$300.

Mrs. Ruby Armstrong and the children, Patricia, 18 and Donald, 11, were to return home later by train and ferry via Seattle, probably arriving Friday.

Cost of the trips, compensation and other expenses is to be paid out of a relief fund established by Saanich Chief W. A. Pearson and Det. Robin Stewart, its trustees.

Donations from Greater Victoria so far total more than \$274,000.

Total of 19 Ships Sail Island Waters

By MONTE ROBERTS

Largest fleet exercise ever held by the Royal Canadian Navy Pacific Command will be carried out in Vancouver Island waters Sept. 14 to 25.

About 2,300 officers and men will take part. All but three ships of the Pacific fleet will participate.

The exercises will be in Barkley Sound and waters adjacent to Comox.

A total of 19 ships, including four auxiliary vessels, will be involved.

"Destroying ships" will be the destroyer escorts Assiniboine, Ottawa, St. Laurent, Fraser, Margaret, and Skeena; the frigates Sussexvale, Ste. Therese, Stettler, New Glasgow and Jonquiere; the minesweepers Fortune, James Bay, Miramichi and Cowichan.

Also taking part will be helicopters and Avengers from the RCAF's Vu-33 Squadron based at Patricia Bay, and CF-100's from RCAF 408 Squadron, Comox.

The fleet exercise will be under overall command of Rear Admiral H. S. Rayner, flag officer, Pacific Coast, and under the direction of Capt. James C. Pratt, commanding officer, Second Canadian Escort Squadron.

The extensive drill will include weapons training, mine sweeping, anti-aircraft and surface firings, and seaman ship drill.

Coun. Stanley Murphy, chairman of the committee, who jumped into the argument, said Coun. Casey was advocating "topsy-like growth for Saanich instead of planned scientific development."

Most municipalities across Canada had planning boards, including private industries, he said. Burnaby had a board of eight technicians, while Saanich had only one.

The clash broke out at a Lands and Planning committee meeting when Coun. Casey said Saanich could do without a planning department.

It was costly trill, he said.

The reeve argued that planning ahead was preventing costly mistakes in road and subdivision developments.

It was also safeguarding the investments of home owners and curbing health problems, he said.

Coun. Stanley Murphy, chairman of the committee, who jumped into the argument, said Coun. Casey was advocating "topsy-like growth for Saanich instead of planned scientific development."

Most municipalities across Canada had planning boards, including private industries, he said. Burnaby had a board of eight technicians, while Saanich had only one.

The argument was started when the committee was asked to appoint a committee to select an assistant for Tony Pair Saanich planning engineer. Council earlier this year approved the hiring of an assistant planner.

Mr. Parr informed council that he was finding it difficult to cope with mounting municipal business.

This included, he said, community plans for Gordon Head and other areas, drafting zoning regulations, seeing that subdivisions were properly laid out.

In addition, he added, his work included traffic research, planning community facilities, such as parks, and assisting the municipal engineer.

The committee supported the reeve in his argument for town planning.

SUN RETURNS ON THURSDAY

Cloudy skies and scattered showers this evening and overnight will give way Thursday to lighter cloud with a few sunny periods, according to the weatherman.

Winds, which blew from the southwest today at up to 25 miles per hour, will drop to westerly at 15 miles Thursday. Temperatures will range between 55 and 65 degrees.

Driver of Car In Fatal Mishap Pays \$40 Fine

Driver of a car in fatal collision with a city policeman was found guilty of carelessness driving and was fined \$40.

Edward G. Whitehouse, 4025 Saanich, had pleaded not guilty to the charge, and his trial today lasted two hours.

Cons. Earle Doyle, 29, died of head injury received when his police bike crashed into the Whitehouse car on Douglas the night of July 12.

Police quoted Whitehouse as saying at the time, "I didn't see the motorcycle until it hit my right wing and the driver went over my car."

Robert Alan Graham, 1015 Tolmie, who was in a car about 120 feet behind the Whitehouse car just before the accident, said he saw the officer approaching for a considerable distance before the crash.

Magistrate William Ostler said he was not there to judge the unfortunate result of the accident, but rather the accident itself, which was similar to a great many which come before him.

City Woman Enjoys Reunion in Ottawa

Mrs. Fred J. Smith, 321 Montreuil Street, has been enjoying a family reunion in Ottawa which was organized by her brother after 30 years of work in tracing his missing sisters.

The family of one son and five daughters was separated in 1916 when their mother died Jan. 10 and their father Jan. 30.

The oldest son was with Canadian forces in France at the time, and could not help. He was killed in 1917.

The oldest sister, Mrs. Smith, eventually moved to Victoria and married here. The rest were placed in foster homes and orphanages, and one, Agnes, is still missing.

Charles Court, the surviving brother, lives in Ottawa, and did the bulk of the work in finding the family. He located Mrs. Smith in Victoria in 1927 with the help of the RCMP, and in 1928 located another sister near Ottawa.

The fourth sister found Charles in 1931 by checking telephone listings, and the youngest found him in 1934 with the help of the Ottawa police department. Since that time he has kept in touch with them all, but this was the first time he has been able to get them together at one time.

Join the Sox Rage, Teens! Poodle, Twirl, Popcorn Cuff

By PENNY SAVER

Get in on it, girls! The newest teen rage is on, and you'll want to know about it for all important "First Day back at the High."

What is it? Sox, of course. Everybody'll be wearing them—fancy socks with the cool cuffs. All white—to show off that tan you've been working on all this time—they'll complement the dark colors so flattering for fall clothes.

Rage is the cuffs. Puffy popcorn stitch—inches and inches of it—to make a three-quarter-length sock, or soft and bulky triple turn-over cuff.

Poodle cuffs are another dandy for the smart sox wardrobe. Twister-twirlers—for you to twist "as you like it" are more newcomers to the sock world.

Choose the kinds you'll be wearing this fall—then phone me. I'll tell you where to find them—at the lowest possible prices.

Combed cotton socks with nylon reinforced feet, elastic around top of the long cuff—to keep it up—cost 59 cents. Soft n' strong nylon, with stretchy foot sizes are 79 cents.

For the high school miss—with a home-e course in her future, I've found yardage of tartans, tweeds, charcoal grey flannel, smart black wool. It's just the right amount for a straight skirt, or a pair of tapered slacks, or a jumper—and you get a picture of the sewing pattern most suitable for the material you choose.

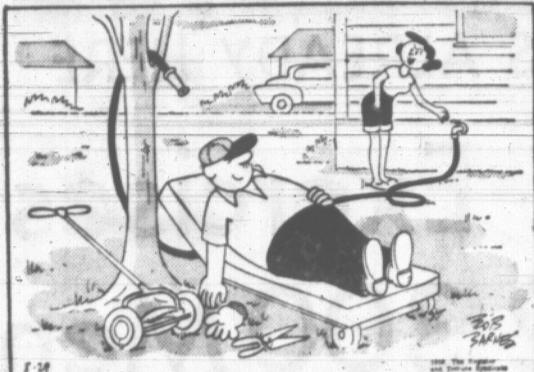

Believe it or not, \$1.49 will buy enough of the wide material for a complete skirt! Real English wool flannel costs \$3.69 for enough for a skirt.

Zipper binders are last on the list today. Smart and simple simulated Morocco leather, three-ring binders cost only \$1.98. Colors are red, natural leather and black.

EV 2-3131 is the number to call for where to find these items.

THE BETTER HALF

by Bob Barnes

"Ten, nine, eight, seven, six, five . . ."

DEAR ABBY . . .**Your Morals Are Showing, Ma'am!**

By ABIGAIL VAN BUREN

DEAR ABBY: I'd like your help in convincing my husband that we are living in a modern world. We aren't kids. We are in our forties and have been married 18 years. I don't neglect the kids (or him) and see nothing wrong with an "affair" as long as nobody is hurt. I don't want a divorce. I just want to go on as I have been. Being a woman, you should understand.

AVERAGE WIFE.

DEAR AVERAGE: I "understand" but I disagree. Women who see "nothing wrong" with an "affair" need a dog licence—not a marriage licence.

DEAR ABBY:

I love my sister very much. She has been married to a prince of a man for 12 years and they have two children. Her husband was injured on his job and he is in a wheelchair, paralyzed from the waist down. She went to work to help out and met another man (her boss) and fell in love with him.

She is presently divorcing her husband to marry the other man. I do not approve of what she is doing, but she is still my sister. My husband says he will never speak to her again. He refuses to meet her fiancé. This is making it hard on me. Do you think I should break off relations with my sister because of the way my husband feels? Why shouldn't we be friendly with her and her new husband?

TORN

DEAR TORN: If you want

to be friendly with your sister and her new husband, you have a right to, but your husband has the right to ignore them. Your sister has broken a sacred vow to "love and cherish in sickness and in health," etc. You might still "love" your sister, but you surely can't respect her.

CONFIDENTIAL TO MRS. A: Your problem is not worth losing sleep over. Tell your husband you have charged more than you can pay for. He won't be the first husband who has lived through this kind of news.

DEAR ABBY: Tell that little fuss budget who wants everything he eats served on separate dishes, he will have to wash the dishes himself. I'll bet he starts eating off one plate soon.

I once had a small visitor years ago who used to wet her bed the first few nights. After I made her wash her own sheets and hang them out to dry a couple of times, she managed to stay dry. It makes a difference when they have to do the work themselves.

MOTHER OF FOUR

DEAR MOTHER: Bed-wetters should not be dealt with in the same manner as refreshments, entertainment.

Not True Canadian Men Have no Manners Victorians Tell Reporter

BY SONJA STRANDLIE

Canadian men have no manners. Equality-conscious Canadian girls are independent. These statements were made to the press by a 23-year-old English girl from Bristol after a year on exchange at Kitimat, B.C.

Miss Barbara Tann, daughter of the manager of a Bristol soccer club claimed: "No Canadian man would dream of opening a door for a girl or helping her on with her coat . . . if he did the equality conscious Canadian girls would take it as an insult."

Them's fighting words, pardner.

I might concede the independent spirit but the rest I questioned. So much so I went

looking for answers. And here they are:

Miss Julie Payne, a Publicity Bureau stenographer, said: "I think that's entirely wrong. We meet people from everywhere; we see courtesy here all the time. And Canadian girls appreciate anything along that line even though they do feel equal to men."

Miss Dale Jones, doctor's receptionist, said: "I don't think that's right. As a group I think they (men) are very good when it comes to manners. You will find one or two who are the exception, of course. As for the girls, I think they feel quite honored when a man opens a door for them or assists with a coat."

Reporter Mike Rose took a

quick look at the Canadian Press report that recorded Miss Tann's remarks and said: "Her lack of knowledge of Canadian men is only exceeded by her ignorance of the Canadian woman."

Chamber of Commerce managing secretary, John Coppinger, commented: "As far as I am concerned the manners of business men in Victoria are fine . . . above average. In public places, such as queueing for buses, Victorians have good manners. Women respond to courtesies here . . . more so than in other cities. I think that perhaps the size of a city counts as far as manners are concerned."

When I read the exchange teacher's remarks to nurse

Peggy Brown, she retorted: "That's ridiculous! On the whole I think Canadian men are just as gallant as other nationalities. Mind you, there is a change in pace between hospital and street manners . . . they (patients) expect you, as a nurse, to look after them, not them to look after you! If a male patient is well enough he will assist his nurse with her strenuous duties. If he is not well enough he will insist that the nurse get help."

Provincial archivist Willard Ireland said: "My comment is

she (the English school teacher) is obviously not a Canadian! Women like to feel respected . . . equality has nothing to do with it. It is a matter of respect!"

A housewife who wished to remain anonymous told me: "On the whole, men are polite, if you treat them nicely. And they certainly appreciate recognition of their gallantries."

Well, Miss Tann! It would seem consensus of opinion is against you.

Canadian men are polite!

(At least in Victoria.)

A 25th Anniversary

Mr. and Mrs. J. E. Philion entertained at their home on Robleda Crescent on Tuesday evening on the occasion of their 25th wedding anniversary. They were married in St. Andrew's Cathedral on Aug. 25, 1934. A two-tier wedding cake centred the refreshment table with arrangements of roses. Mr. Alex Heard proposed the toast to the anniversary couple. Invited guests were Mr. and Mrs. E. Brown, Mr. and Mrs. G. Cox, Mr. and Mrs. J. S. Cox, Mr. W. L. Clarke, Mr. J. Cuelenaere of Leask, Sask.; Mr. D. Deacon, Mr. and Mrs. R. Fairbrother, Mr. and Mrs. A. J. Heard, Mr. and Mrs. B. Kirkby, Mr. and Mrs. S. Kirkby of Vancouver, B.C.; Rev. K. King and Mrs. King, Mr. and Mrs. V. Kirkby of Bellingham, Wash.; Mr. and Mrs. A. Kirkby, Mr. and Mrs. L. MacDonald, Mr. R. McDonald, Mr. and Mrs. C. Quest, Mr. and Mrs. C. Risbrow, Mrs. M. Rogers of Toronto, Miss B. Simister and Mrs. V. C. Timberley of Vancouver, Mrs. M. W. Ward, Mr. H. Westmacott, Mr. and Mrs. A. Unwin and Mr. M. Kersey. Mr. and Mrs. Philion have five children, Mr. George Philion, Mr. John Philion and Miss Jeanette Philion, all of whom were at the party, and Master Richard Philion and William Philion.

In Kelowna

Mr. and Mrs. E. Drummond Taylor and their eldest daughter, Marilyn, are presently visiting Mr. Taylor's brother and family, Mr. and Mrs. Cameron Taylor, in Kelowna, Virginia and Sheila, Mr. and Mrs. E. D. Taylor's younger daughters who have been in Kelowna for the past month will return with their parents to their Ash Road home this weekend. They are motoring.

Honor Bride-Elect

Bride-elect Miss Patricia Samuel was honored recently at a shower given by Mrs. F. Ramsdale and Miss F. Boden in the Albion Road home of the former. Corsages of gladioli and roses were presented to the guest of honor, her mother, Mrs. H. Samuel, the groom-elect's mother, Mrs. F. Taylor, the bride-elect's grandmother, Mrs. L. Kelly. A decorated container with an umbrella cover held the gifts. Guests included Mrs. L. Maycock, Mrs. C. Da-

vies, Mrs. D. Roskelly, Mrs. E. Sabiston, and the Misses Lenora Lancaster, Laurel Banfield, Anne Davies and Pat Boden.

Dinner Party

Mr. and Mrs. Earl M. Robertson of Toronto are entertaining at a dinner party Friday evening at the Princess Mary Restaurant following the wedding rehearsal of their daughter, Miss Jane Robertson and Lieutenant Bryan J. Berryman, RCN, in Our Lady Queen of Peace Church. Also attending the party will be the groom-elect's parents, Mr. and Mrs. John Berryman of Liverpool, N.S.; the bride-elect's sister who will be matron of honor, Mrs. Anthony Bazos, Toronto, and Mr. and Mrs. O. R. Edmunds also from Toronto.

On Holiday

Mr. and Mrs. Reg. Steiner and their family, Rima, Dennis and Wendy, are holidaying at Parksville this week. They will return to their Christmas Avenue home this Sunday.

BRUCE-McNEILL

West Vancouver Church Setting for the Wedding

White and shell-pink gladioli and white tapers decorated St. Stephen's Anglican Church, West Vancouver, for the marriage of Miss Murray Eleanor McNeill and Douglas James Bruce. Rev. E. W. Carter officiated.

Parents of the bride are Mr. and Mrs. Neil M. McNeill of West Vancouver and the groom's parents are Mr. and Mrs. E. Bruce of Barking, England.

Period style bridal gown was of peau de soie and imported Guipure lace fashioned with fitted bodice embroidered with garlands of lace, scalloped neckline, lily-point sleeves and a full skirt that extended from unpressed pleats to a chapel train. A headress of pearls and crystal tear drops held the French illusion veil and Hawaiian orchids and white stephanotis were in the bouquet. Bride was given in marriage by her father.

Bermuda blue ballerina-length gowns were worn by the bride's attendants. Blue accessories and blue stephanotis completed the outfit. Miss Marilyn Tiderington was maid of honor. Miss Maureen McNeill and Mrs. Barry Jenrey were bridesmaid and bridesmatron and Wendy McNeill was junior bridesmaid.

Ted Shipman acted as best man and George Longstaff,

Honeymoon in Bahama Islands

Mr. and Mrs. R.E. Godet, 962 Loyola Avenue, have announced the engagement of their eldest daughter, Marilyn Ann, to Mr. Joseph (Pat) Graham, son of Mr. and Mrs. E. Graham of Calgary. Wedding will take place in First United Church on September 12 at 7:30 p.m. with Rev. A. J. Higgins officiating. (Photo by George Simpson.)

A wedding trip to Nassau in the Bahamas followed last Saturday's wedding in Halifax of Miss Virginia Eileen Ritcey, and Mr. George Newport Woollett of Victoria and Port Radium, N.W.T.

St. Andrew's United Church, Halifax, was scene of the vows which were heard by Rev. W. Charles Anderson. Soloist was Mrs. Malcolm Bruce and Miss Marjorie Payne played wedding music.

Bride is the daughter of Mr. and Mrs. Everett M. Ritcey of Halifax, and the groom is the son of Mrs. Herbert G. Woollett, Victoria, and the late Mr. Woollett.

The bride wore a full-length gown of Chantilly lace and net posed over satin. Fitted bodice was cut with a round neckline and long, lily-point sleeves. Panels and appliques of matching lace adorned the bouffant net skirt. Nylon illusion tulle formed the chapel veil which was held in place by a pearl encrusted coronet. Her jewelry was a double strand of cultured pearls, gift of the groom. She carried a cascade of American Beauty roses and stephanotis. Mr. Ritcey gave his daughter in marriage.

Maid of honor was Elizabeth Stewart, New York. Bridesmaids were Ann McKay and Joan Edwards of Halifax, and

the bride's cousin, Verilia Ellis, gladioli. Mrs. Ritcey wore a dress of champagne satin with lace overskirt and picture hat of coffee organza trimmed with flowers and feathers. Her corsage was orange delight roses.

Laurie Woollett went from Montreal to be best man for her brother. Gordon Ritcey, Ottawa, and Robert Hanes and Roy Kimball, Halifax, were ushers.

Bedford Room of the Nova Scotian Hotel was setting for the reception. William Dunphy, Philadelphia, proposed the toast to the bride.

Leaving for a wedding trip the bride chose a French silk and satin ensemble in sapphire blue with matching velvet hat and shoes, beige accessories, and pink roses en corsage.

The couple will make their home in Port Radium, N.W.T., where the groom is chief geologist with Eldorado Mining and Refining Ltd.

Loose Rail Cause Of Fatal Crash

TRAfalgar, Ont. (CP)—A CNR section foreman told an inquest Tuesday night that he had spikes removed from a section of track shortly before a passenger train derailed last month in which two women died.

James Buttaro, who testified under the Canada Evidence Act, said the spikes were removed to push a twisted rail back into alignment. The train arrived before the job was done.

The July 21 crash killed Mrs. Lillian Moore, 65, of Ashton, Ont., and Mrs. Gertrude Doran, 73, of North Bay. A section of broken rail pierced the coach in which they were sitting. About 30 other passengers suffered minor injuries.

Mr. Buttaro said he noticed the rail swaying and out of alignment. He said he decided to remove several spikes to loosen the rail before attempting to force it back into place. Two laborers were helping.

Crown attorney Peter McWilliams asked: "Did you consider giving a signal to approaching trains?"

Mr. Buttaro replied: "No, I needed all the men I had."

John F. Sinclair, CNR general roadmaster said the removal of spikes should automatically result in the posting of warning signals by a foreman. He did not agree, however, that the removal of spikes was necessary in this case.

The foreman now is under suspension by the CNR.

WASPS KILL CHILD, HUNTER

KOTA BHARU, Malaya (Reuters)—A five-year-old girl was killed and her mother and 11-year-old brother badly hurt when attacked by a swarm of wasps.

MARTINSVILLE, Ind. (AP)—A squirrel hunter stepped on a wasp nest Tuesday and was stung to death. Carl A. Rizzo, 37, tried to run to a nearby creek to elude his attackers but dropped dead before he could reach the water.

Parity bonds unconditionally guaranteed by the entire resources of the province and redeemable any time at full purchase price

For the first time, the people of British Columbia are invited to participate in, and profit financially from, the development of one of our Province's greatest enterprises. The offering of this bond issue, exclusively in B.C., means also that interest which normally would be paid to people outside the Province will be paid directly to British Columbians.

The PGE is now one of the world's most modern railroads and a vital factor in British Columbia's growth. The three year, 5% bonds of the Pacific Great Eastern Railway that are now being offered are the soundest bond buy on the market—an excellent way to let your savings earn more for you.

DENOMINATIONS: \$100, \$500, \$1,000.

INTEREST: Interest at the rate of 5% per annum will be paid quarterly on the 15th day of December, March, June and September during the currency of the bond.

DATE OF ISSUE: September 15, 1959.

DATE OF MATURITY: September 15, 1962.

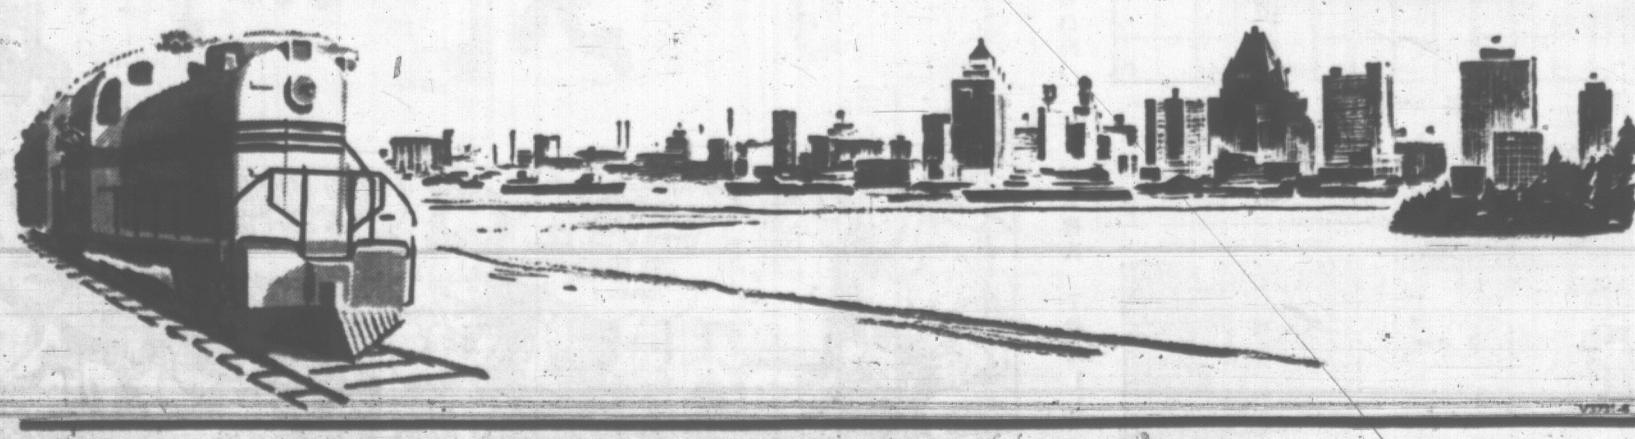

REDEMPTION: Should you need the money in a hurry, you will be able to cash these bonds at par value at any time you wish, at any bank in the Province of British Columbia and at the principal office of the Canadian Bank of Commerce in Calgary, Edmonton, Regina, Winnipeg, Toronto, Montreal, Saint John, Halifax or St. John's.

LIMIT OF PURCHASE: There is no limit whatsoever to the amount you may purchase.

REGISTRATION: Bonds of \$500 and \$1,000, or multiples thereof, can be fully registered.

PAYROLL DEDUCTIONS: Bonds may be purchased through payroll deduction. Your office manager will advise you.

SOLUTION FRIDAY

Is there something you want to know? Do you want to win a set of valuable books or other, destructive prizes? Then ask Andy.

Andy will answer questions submitted by child readers and those who submit the questions he selects to answer will receive worthwhile prizes.

The youngster who asks the first question answered each day receives a 15-volume set of Compton's Pictures Encyclopedia (Canadian edition) and of the second question a Hammond Atlas or Globe.

Address your questions to "Ask Andy," Victoria Daily Times.

Andy sends a complete, 15-volume set of Compton's Pictures Encyclopedia to Charles Grichar, age 9, of Houston, Texas, for his question:

Is There a Real Smoky Bear?

Some years ago a baby bear was born in a deep forest, the Lincoln National Forest, in New Mexico. He romped under the shady trees and he rolled in the soft grass. He made friends with the sassy squirrels and the bunnies, with the deer and the frisky frogs. He watched the flashing trout in their streams. Every little while he ran back to share his fun with his big, cuddly mama.

The green spring turned to a hot, rainless summer. The thirsty forest became parched and dry. Then, one day a care-free person walked under the trees. Maybe he flung down a smouldering match or cigarette, maybe he left a campfire unattended—we are not sure. But we do know that he left a spark on the dry forest floor—and went thoughtlessly away.

In the dry grass and leaves, the spark became a little flame. The flame became a greedy tree.

Survived With Firefighters

Ranchers, woodmen and soldiers joined the firefighters and 24 men were almost trapped. They escaped only because they hid in a rock slide.

Later, when at last the fire was quenched, these men looked around at the charred earth, the scorched and smoky remains of the terrible forest fire.

Slowly, very slowly, Smoky Bear got well. The rangers told his tragic story on the radio and on TV. Smoky was able to make some people listen and be careful about forest fires. The U.S. Forest Service employed him to carry on his good work. He went to Washington, D.C., where he now lives in his own home in the zoo.

WRIGLEY'S SPEARMINT CHEWING GUM

IT HAPPENED LAST NIGHT

By EARL WILSON

NEW YORK — I love cops . . . they've never even given me a ticket, bless 'em . . . and yet . . .

The only big N.Y. TV series Hollywood hasn't grabbed off, or knocked off, stars Edward Binns playing a shoo-fly cop in "Brenner" on CBS.

A press agent had a brilliant idea recently when Binns came in from L.A. He phoned Police Commissioner Kennedy's office:

"We could get a great news picture at the airport if you'd have two pretty policewomen greet Binns."

"What!" roared a Kennedy aide. "Binns plays a shoo-fly. Not only do we refuse to cooperate . . . we don't like the show!"

The shoo-flies, whose duties include checking up on other cops, are usually recognized, despite their plain clothes.

"The N.Y. cops have a set of signals, like a baseball team, and when a shoo-fly comes around you can see them making signs," says Binns.

"Actually, the regulations are strict. A cop on a beat isn't supposed to go into a restaurant to go to the powder room without calling the sergeant. It's just like in school when we had to say, 'Teacher, may I leave the room?' Now it's, 'Sergeant, may I leave the sidewalk?'"

* * *

Hollywood's Joe Pasternak has shown professional interest in shapely Paris-born actress Josette Banzel—who now lives in Hackensack, N.J. Josette was telling me at the Harwyn that at 14, she was embarrassed at having a size 38½ "boob." She added, "But when I see how theeengs are in New York, I was very happy about it." In Paris where the sizes are in centimeters, Josette wears size "quatre-vingt-seize" 96!

* * *

Andy Williams wants to bring B. Bardot's sister Mijanou here for his TV show. Paramount's coaxing Hedy Lamarr to make TV appearances when her "Samson and Delilah" film is revived . . . Maurice Evans says his next show (a fter "Destry House") will be a musical . . . the Hotel Shelburne's redecoing a suite for Katherine Hepburn.

Blonde, busty Sandra Giles, a Jayne Mansfield lookalike, says her dates with Franck Tone "are as serious as can be" . . . Andy Griffith's parents arrived from Mt. Airy, N.C., to see him in "Destry" . . . the Nat Coles, who have two daughters, named their adopted son Nat Kelly Cole.

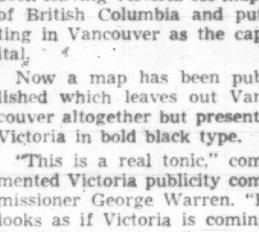

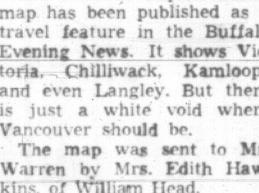

EARL'S PEARLS: The trouble with some people who give till it hurts is that they're so sensitive to pain.—Quote.

WISH I'D SAID THAT: A reader offers this simile: "As unhappy as a woman with a secret nobody wants to know."

TODAY'S BEST LAUGH: You can always pick out the lout at a wedding. He's the guy who wants to kiss the bride and punch the groom.

Blonde, busty Sandra Giles, a Jayne Mansfield lookalike, says her dates with Franck Tone "are as serious as can be" . . . Andy Griffith's parents arrived from Mt. Airy, N.C., to see him in "Destry" . . . the Nat Coles, who have two daughters, named their adopted son Nat Kelly Cole.

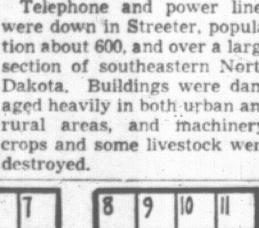

"I am greatly indebted to her," he said.

SINGERS, DANCERS, MUSICIANS

Russian Hit in Toronto

TORONTO (CP) — A company of 200 singers, dancers and musicians of the Russian Festival Music and Dance filled Maple Leaf Gardens, Tuesday night, and quickly made friends with an audience of about 7,000.

The incredible array of folk music and dance that was fast-paced, vividly contrasted and colorful drew thunderous response from the first whisper of the huge Platinitsky folk choir to the stage-filling finale.

And when the house lights went on at the end of the performance, the company remained on the stage, waving goodbye to the audience.

With a huge troupe made up of a dozen Soviet state companies, the opening-night programme was built around the 45-member Platinitsky choir and studded with the sensational leaps of the dancers, sensual Armenian dances, plaintive folk songs and samples of classic ballet and opera.

A violent dance by the Armenian State Dance Company was followed by a selection from Swan Lake danced by Nina Timofeyeva and Yuri Zhdanov, of the Bolshoi Ballet.

2 LEAVING FOR FEDERAL CS PARLEY

Esquimalt Councillors, G. K. Sammon and James Bryant will leave for Halifax Wednesday to attend the Civil Service Federation of Canada convention next week.

Mr. Sammon, who is national president of the 10,000-member Department of Veterans' Affairs Employees' Association, and Mr. Bryant, national vice-president of the National Defence Employees' Association, will head the B.C. delegation.

An anticipated 500 delegates will represent 180,000 federal employees from coast to coast in discussion on wage increases and collective bargaining rights.

They are expected back Sept. 8.

ENDS TONIGHT "THE KEY"

From Weymouth, England, comes this exciting drama in Cinemascope, starring Wm. Holden of "Bridge of the River Kwai" fame, Trevor Howard and Sophia Loren. One of the most gripping pieces of movie story-telling. Without making any apology to morality the situation is handled with definite breadth of insensitivity for its own sake. (N.Y. Herald Tribune.)

SWAGGER STICKS

Air Cadets Get Honors At Ceremony

Mayor Percy Scurrah presented swagger sticks to AC2 Keith Hart, of Victoria High School, and AW2 Joyce Stanforth, as smartest airman and airwoman on parade, following the RCAF trainees' sunset ceremony at the Legislative Buildings lawn.

The most proficient airwoman was AW2 Delta Thompson, Victoria College; and the most proficient airman AC2 Barry Sadler, Victoria High School.

Most "improved" airman was AC2 Kent Elliott, Oak Bay High, while AC2 Bill McCoy, of Courtenay, was adjudged most proficient air cadet.

Trainees with the highest achievement in their trades were AW2 Evelyn Maurice, AC2 Stephen Gains and AC2 Gary Yee, all of Victoria High School.

The 1959 graduation awards were made to members of 2455 AC & W Squadron under the RCAF reserve tradesmen training plan.

Canadian Trustees Of Assets—Stevens

The people of Canada, and especially B.C., were called on to realize their responsibilities and economic potential Tuesday by the Hon. H. H. Stevens at a Kiwanis luncheon in the Empress Hotel.

The former minister of trade and commerce in the R. H. R. B. Bennett government criticized Canadians for lack of confidence in themselves and slow progress.

"We didn't create our assets," he said, "we are just sets."

"We have valuable assets and it is our duty and responsibility to develop them."

He cited Canada's "tremendous" adverse balance of trade with the United States as an example, saying that because of heavy U.S. investment here and shipments of Canadian gold south we were able to

Kostenuk, Smith Win

Veteran stock car drivers Ed Kostenuk and Al Smith scored main-event victories in weekend Club is Sunday, and the qualifying View Beach.

Kostenuk took the 25-lap "B" main event and Smith won the 20-lap "A" event.

Winners of the weekly tourna-

ment of the Victoria unit, American Contract Bridge League follow:

Ethel Cleworth and Harry Parry; Mr. and Mrs. S. A. Du-

prau; Eric Goodwin and Jim Duprav; Otto Leesment and Tony Marsh (tied); Albert Jorgensen and Stan Trickey; Mr.

and Mrs. Harry Brown.

Sprained Ankle Halts Ballerina

LONDON (CP) — A sprained ankle has cost Lynn Seymour her chance for a second appearance as a soloist with the Royal Ballet at Covent Garden.

The 20-year-old ballerina from Vancouver, whose debut in Swan Lake was warmly praised last May, was to have danced the leading role in La Bell Dame sans Merci, a new ballet by Renee Howard based on Keat's poem. The ballet will have its London premiere next Monday.

Covent Garden officials said today the sprain will keep Miss Seymour out of action for a few weeks. Her role may be given to another youthful member of the company, Georgia Parkinson.

DISLODGED REBELS OFF 10,000-FT. PEAK

ATTACK OF LARYNGITIS PUTS PRINCESS TO BED

LONGREACH, Australia (Reuters)—Princess Alexandra was ordered to bed today with a mild attack of laryngitis and forced to cancel one of the engagements on her Australian tour.

U.K. Honors Heroes of Secret War

LONDON (AP)—The Queen today approved awards to 31 British troops who fought a secret war in the Arabian Desert.

The air-borne task force—175 men of Britain's special Air Service Regiment—flew to

the British protectorate of Muscat and Oman last January. Rebels there had seized a seemingly impregnable position atop 10,000-foot Mount Akdar. They repulsed every attempt by troops of the sultan to dislodge them.

The British force flew in

from Singapore with Lt.-Col. Tony Deane-Drummond in command.

"By a forced night march up extremely difficult country, Deane-Drummond surprised the enemy and gained complete success," the official London Gazette related today.

NO TRAFFIC DEATHS FOR 1,095 DAYS

WOODSTOCK, Ont. (CP)—This city of 19,000 has entered its fourth year without a traffic fatality, Chief Constable W. J. Ennis said Tuesday night.

The last fatality on city streets was in 1956. Since then, 1,095 fatality-free days have elapsed.

There's no place like SAFEWAY for RIB ROAST

The combination of things we do makes Safeway Rib Roast a better buy for you

It's Grade Red A Beef—the grade that means top flavor, tenderness, juiciness. We buy nothing less than 'Red' Beef.

PROPERLY AGED: In our own modern meat plant, Safeway Beef is brought to eating perfection, by careful aging in special climate-controlled rooms.

TRIMMED BEFORE WEIGHING. A Safeway Rib Roast is just the meaty center portion you see in the picture. We remove the heavy chine bone and replace it with a layer of light-weight fat to seal in juices. We cut off the short-rib section, too. You get a roast that cooks right, carves right, and tastes just wonderful. More good-eating meat for your money.

PERFECT-EATING GUARANTEED. You can't miss with Safeway Rib Roast—or any Safeway meat. We guarantee complete satisfaction—every cut, every time—or your money back without quibble.

Enjoy this finer Rib Roast at our good-value price.

VICTORIA, B.C., WEDNESDAY, AUGUST 26, 1958 17

SCHOOL DAYS STILL TWO WEEKS AWAY BUT HEADACHES ALREADY HERE

Charter Plane Service Planned

A new charter aircraft company will start operations from Patricia Bay Airport Saturday.

Victoria Flying Services Ltd. will operate under a "C" Department of Transport licence and will conduct "air taxi" services as required, operate a flying school, and repair aircraft.

Principals in the new venture are Bill Sylvester, former owner and founder of B.C. Airlines of which he is still a director; Eric A. Cox, secretary-treasurer who was also associated with Mr. Sylvester in B.C. Airlines, and J.W. Howroyd, co-owner of an airstrip outside Victoria.

Initial investment was \$150,000. The company was incorporated for 200,000 shares at no par value.

-Six new Cessna aircraft will form the nucleus of the company's air operations.

Headquarters is in No. 15 hangar at Pat Bay, where floor space has been rebuilt for the repair shop, offices and waiting room.

Aircraft will also be stored by the new firm.

In addition, an "aircraft rental" service will be conducted for the Cessnas, which will take pilot and three customers.

NEW COMMANDING OFFICER OF NO. 11 AIRCRAFT CONTROL AND WARNING SQUADRON AT LAC ST. DENIS, QUEBEC, IS WING COMMANDER W. J. SMITH, 43, OF VICTORIA, RCAF HEADQUARTERS ANNOUNCED TODAY. W/C SMITH RELINQUISHED DUTIES WITH THE CANADIAN JOINT STAFF IN WASHINGTON, D.C., TO TAKE UP HIS NEW POST. HE JOINED THE RCAF IN MAY, 1941, AND SERVED AS A FLYING INSTRUCTOR AND BOMBER PILOT DURING THE WAR.

Wreckage Believed Identified Earlier

Search parties at Mount McCreight, near Campbell River, endeavored today to identify aircraft wreckage reported seen on the weekend, and now believed to be that of a wreck which was found and fully investigated in 1951.

Ground parties are on the mountain, and at noon today a Piasecki helicopter from VU 33 Squadron, RCAF, at Patricia Bay, was trying to find a way to the 4,000-foot level on the mountain through overcast only 800 feet above ground.

Two Neptune aircraft from the United States crashed on Vancouver Island — one in November, 1948, and the other in December, 1950. It was the wreck of the latter which was found the following September, with the skeletons of 11 crew members.

In fact, the air force said, the message was a request by the searchers for information on a crash in the area in 1951 of such a plane with 11 men aboard, and the misunderstanding was due to poor reception of the message.

Bodies from the 1951 crash were removed the following year but the wreckage was left at the scene.

When Cpl. W. H. Glover of

TOPICS OF THE DAY

Victorians will get a chance to see Prince Philip's racing yacht Bluebottle when it moors in Inner Harbor Thursday. Dressed over-all, she will stay at the Causeway from mid-morning until evening before being transferred to navy moorings in Esquimalt Harbor.

Lighting an incinerator fire without a permit resulted in a grass fire and subsequent \$15 fine for George Donaldson, 1540 McRae, in Saanich police court Tuesday.

Court was told Donaldson's fire got away and burned more than an acre of grass before it was put out by the fire department.

He said he thought a permit he obtained more than a year ago was still valid.

ASK The TIMES

Q. Could you tell me who was the last reigning sovereign of France and why France no longer has a monarch? B.V.M.

A. Last king was Louise Philippe, who reigned from 1830 to 1848, when a republic was established and Louise Philippe abdicated. The monarchy was weak and a determined minority was sufficient to overthrow it.

Q. Will you please tell me if the Todd-o-a screen at Vancouver's Stanley theatre is cinerama; if not, what is the difference, and can one see cinerama in Vancouver or Victoria? E.R.M.

A. The Todd-o-a screen is not cinerama, it's Todd-o-a. Cinerama uses three projectors to give picture depth, while Todd-o-a utilizes only one. You can see cinerama at the Strand in Vancouver. There is none in Victoria.

Anyone wishing a question answered is invited to send the problem along with name and address to "Ask The Times" Editor. Questions and answers will be published daily.

All questions must be matters of fact and be of general interest. The Times does not undertake to solve complex or legal problems. Nor will it attempt to put values on art, coins, stamps or antiques. These should be submitted to dealers.

Victoria tug Cambrian Sailor expects to reach Yokohama, Japan, Saturday, to end a 10,000-mile journey towing a 30,000-ton battleship to a scrapyard. Skipper James van Konno earlier turned down "not required" offer of assistance in bringing the ship in, from fellow tug Sudbury II, which recently arrived in Japan with two 10,000-ton Liberty ships, also bound for the scrap heap.

The fund—which aims at \$4,600—today totalled more than \$2,715.

Unless the balance is made up, Mrs. Elsie Fisher and her three small children will face a "bitter struggle," a campaigner said.

Collapse of its retractable undercarriage caused a Victoria-owned Seabee amphibian to lurch and skid while landing at Patricia Bay Airport Tuesday.

Victoria Flying Club head-instructor David Flyby was at the controls, accompanied by passenger William Nelson.

No mail will be delivered by the post office on Labor Day, Sept. 7, and wickets will be open from 10 to noon for stamps but not money orders. Normal holiday service will be observed for special delivery and mail receipts and dispatches. The post office lobby will be open 8 a.m. to 6 p.m.

A Seattle woman tourist who broke a hip while shopping with two friends on Government Street, Tuesday afternoon, is in fair condition at St. Joseph's Hospital.

Police took Mrs. Meta Scholl, 65, to hospital after she fell in the 900 Block.

City police commission meets Thursday at 10:30 a.m. in city police headquarters.

Huge Fleet Exercises To Engage 2,300 Men

Chief's Auto Hit Answering False Alarm

A fire chief's car responding to what turned out to be a false alarm crashed into a light pickup truck, causing an estimated \$1,250 total damage at Cook and Pandora today.

Deputy fire chief Ted Beales, his passenger, fire department secretary Bill Smith, and driver of the pickup, Kenneth M. Beattie, 1236 Oscar, escaped the collision with bruises.

The deputy chief was speeding from downtown to the Yates Street main fire hall just after 9 a.m. going east on the south half of Pandora, siren and red flasher going.

Police said Beattie was driving north on Cook and had reached about the centre of the intersection of the south portion of Pandora when the fire car struck his truck on the left rear.

Police who attended on the water front said the "emergency" was a boy of about 12 on a rubber raft anchored to a kelp bed about 100 yards offshore, jiggling for cod.

Arrival of Det. Sgt. Joseph Armstrong from a Bozeman, Montana hospital is set tentatively for 11 a.m. Thursday.

The Saanich policeman, who was seriously hurt in an earthquake which swept away himself, his family, and possessions on a mud and rock slide nine days ago, is to be flown here by special air ambulance.

A last minute confirmation will be awaited before the flight is scheduled in the event of poor weather forecasts. The trip is expected to take four hours and cost about \$300.

Mrs. Ruby Armstrong, and the children, Patricia, 18 and Donald, 11, were to return home later by train and ferry via Seattle, probably arriving Friday.

Cost of the trips, compensation and other expenses is to be paid out of a relief fund established by Saanich Chief W.A. Pearson and Det. Robin Stewart, its trustees.

Donations from Greater Victoria so far total more than \$274,000.

The drive — which has "If you don't care, who will?" for its slogan — is for \$25,000 more than was sought last year. The 1958 campaign netted \$274,000.

HUGE CROWDS GREET IKE ON ARRIVAL IN GERMANY

BULLETINS

IN QUEEN CHARLOTTES

Three Quakes Recorded Here

Three "fairly" strong earthquakes originating in the northwest were recorded at the Dominion Astrophysical Observatory, Saanich, early this morning. No damage was reported.

Anne Lucas, seismologist at the observatory, said she suspected the quakes centred in the Queen Charlotte Islands, about 550 miles north of Victoria.

The origin of the third is unknown, but Miss Lucas believes it also occurred in the Queen Charlottes.

The three shocks were recorded at 12:32, 2:28 and 5:02 a.m., Pacific standard time.

The quakes were fairly strong and lasted "moderately long," according to Miss Lucas.

Magnitude of the two first quakes are 4.8 and 5.1. The third has not yet been determined.

COATAZACOALCOS, Mexico (AP)—A strong earthquake shook this Gulf of Mexico port early today, injuring 17 persons and causing severe damage to roads and port installations.

Seven other persons were injured in a nearby village. The shock also was felt at Veracruz, 150 miles to the north.

MINDED. (Disastrous quake in Montana last week was 7.8.)

The two first shocks also were recorded by the University of Washington seismograph.

DR. ANNE STEEL
... 1,207th day in coma

Unconscious City Doctor Weakening

A 40-months struggle for consciousness and life weakened today as Dr. Anne Steel slipped into "unsatisfactory" condition.

"This probably is the worst she has been," a Royal Jubilee Hospital official said as the 39-year-old woman doctor entered her 1,207th day of coma this morning.

Dr. Steel has been unconscious since May 6, 1956, when she suffered a brain injury. Her horse fell while she was riding near Osoyoos, B.C., during a vacation. Her children, Phillipa and Tony, were with her at the time.

The hospital official said her school teacher husband, Philip, and parents, Mr. and Mrs. C. I. Cookes, are continuing daily visits.

Dr. Steel has had ups and downs throughout her coma. This probably is the worst she has ever been," the official said.

Efforts to revive her since the brain injury have been unsuccessful. These included surgery by a top Victoria brain specialist, Dr. John E. Harvey, and four visits by faith healer Dr. Christopher Woodward of London, Eng.

Throughout her unconsciousness, Dr. Steel has been fed by tube.

Born in Scotland, she is a graduate of Edinburgh University. She obtained a Canadian medical degree at Vancouver and interned at St. Joseph's Hospital.

She practised here eight years prior to her accident, in partnership with Dr. Charlotte Doham.

ADENAUER GREETS IKE

West German Chancellor Adenauer talks with President Eisenhower after extending greetings on his arrival at Bonn today. Ike flew from Washington in jet airliner to open series of peace talks. (AP Wirephoto)

Emergency U.S. Aid To Arm Laos Troops

WASHINGTON (UPI)—Rep. Samuel S. Stratton (D, N.Y.) said the U.S. should send marines and an aircraft carrier to help the government of Laos defeat Communist guerrillas.

WASHINGTON (UPI)—The United States has decided to give Laos emergency help in arming 5,000 more troops and militiamen to deal with Communists.

But they said the United States will foot the entire bill, including pay and the cost of uniforms and other equipment.

Officials said the U.S. agrees with Laos that direct military intervention by U.S. or South East Asia Treaty Organization (SEATO) forces is not necessary to deal with the stepped-up Communist guerrilla attacks.

The Laotian government's special representative, Ngon Sananikone, has warned that his government faces collapse if the Communist-inspired rebellion is not soon stamped out.

Informed sources said Herter and Lloyd will meet in London Friday while Eisen-

hower is visiting the Queen in Scotland and before he begins his weekend consultations with Macmillan.

Eisenhower said Tuesday that he intends to suggest to all the responsible officials he meets in Europe that they join in expressing anew a readiness to negotiate with Russia on disarmament, to make a real beginning toward solving the problem of a divided Germany and to help in reducing world tensions elsewhere.

He proposes, too, to suggest that the Allies co-operate in what he called "one of the most pressing problems of our time"—helping some 2,000,000 people in the less-developed lands improve their culture, health and living standards.

Ride in Open-Roof Car to Residence

The airport formalities out of the way in 20 minutes, Eisenhower and Adenauer set out in an open-roof car en route to the American ambassador's residence here, where Eisenhower will spend the night.

The schedule calls for Eisenhower to spend Thursday in Bonn, then fly to London that evening. He will remain in Britain until next Wednesday, then move on to Paris for two days.

Herter plans an advance session with Britain's Foreign Secretary Selwyn Lloyd to map out Eisenhower's talks in London.

Informed sources said Herter and Lloyd will meet in London Friday while Eisen-

hower is visiting the Queen in Scotland and before he begins his weekend consultations with Macmillan.

Eisenhower said Tuesday that he intends to suggest to all the responsible officials he meets in Europe that they join in expressing anew a readiness to negotiate with Russia on disarmament, to make a real beginning toward solving the problem of a divided Germany and to help in reducing world tensions elsewhere.

He proposes, too, to suggest that the Allies co-operate in what he called "one of the most pressing problems of our time"—helping some 2,000,000 people in the less-developed lands improve their culture, health and living standards.

Speed Limit Hike Planned by Ont.

TORONTO (CP)—The Ontario government may raise speed limits this fall to 55 and 60 miles an hour on a number of the province's two-lane highways, it was reported today.

The highways department has recommended the increase in the speed limit by five or

10 miles an hour following an intensive survey conducted during the last seven months on 6,000 miles of two-lane highways.

The report has already been forwarded to the transport department which will submit it to the cabinet for approval by order-in-council.

CNE OFFICIALLY OPENED BY LORD MOUNTBATTEN

TORONTO (CP)—The cavalcade called the Canadian National Exhibition swung smoothly off on its 16-day journey today with bands playing, the fleet in port and the first of nearly 3,000,000 people clicking through the turnstiles.

The CNE was officially opened by Lord Louis Mountbatten, admiral of the fleet and chief of Britain's defence staff.

Though no official announcement has been made of the names of the guests for Eisenhowers private dinner party next Tuesday, Montgomery may be one of them.

Canada's Extremes HIGH—TORONTO 91 LOW—PRINCE ALBERT 40

Wonder what are th' visitin' hours when you're visitin' Adenauer's.

There's still hope—all is not Laos-ed.

You can't complain about earthquakes long's y' git a fair shake.

GOV'T PLANS NO PROBE INTO FISHERMEN'S UNION

VANCOUVER (CP)—Labor Minister Wicks said today that there will be no investigation by the British Columbia government of the United Fishermen and Allied Workers' Union (Ind.).

Spokesmen for a fishermen's committee at Kyuquot, on the west coast of Vancouver Island, said this week the minister promised an inquiry into the union's administration.

The committee has complained that the union is Communist controlled and that it is not being run "in the best interests of labor or of Canada."

Mr. Wicks, in a telephone interview from Cranbrook, said today he probably told the Kyuquot people in a routine way that his department would look into the matter. He said "that's standard procedure."

Asked if he planned an investigation, Mr. Wicks said: "Not at the moment. This is a sort of witch-hunting position and the government doesn't go for that."

ACROSS THE PROVINCE

Yellowhead Car Cavalcade Ends 800-Mile Trip

(From CP Dispatches)

VANCOUVER—The "Yellowhead Overlanders '59" roared into Vancouver in a 51-car motorcade late Tuesday.

It was their last stop in a hectic 800-mile journey from Edmonton, promoting a highway link connecting the Prairie city and the Pacific coast through the Yellowhead Pass.

The caravan was led by Mayor William Hawrelak of Edmonton. It left Edmonton with 62 cars, picked up 32 more in Jasper and finally arrived here carrying more than 200 people.

Mayor Hawrelak will meet Prime Minister Diefenbaker in Ottawa Thursday with his proposal for a southern extension of the Trans-Canada Highway from Jasper to Kamloops, with a 60,000-name petition as ammunition.

BOY KILLED
KAMLOOPS—Robert Lamb, 11, was fatally injured Tuesday night when the bicycle he was riding was in collision with a three-ton truck owned by the municipality of North

FOR QUADRA

\$165,270 Low Tender On Ferry

Allied Builders, Ltd., of Vancouver, submitted the low tender of \$165,270 for construction of a car ferry to serve Quadra Island from Campbell River, according to the highways department.

Tenders for the 110-foot, six-car vessel were opened Tuesday, and now are being studied by department officials prior to letting a contract.

Others were: John Manly, Ltd., New Westminster, \$159,656; Victoria Machinery Depot, \$213,909; Burrard Drydock Co., Ltd., North Vancouver, \$215,315, and Yarrow, Ltd., Victoria, \$219,203.

Qualicum's Golf Entries Pouring In

QUALICUM BEACH—Entries are coming in rapidly for the annual Labor Day tournament to be held at Qualicum Beach Golf Club Sept. 5 and 7, according to committee chairman R. H. Hodgson.

He advised early registration, because only 88 entries will be accepted for the weekend, and the list will be closed if it exceeds that number.

Qualifying rounds will be played Sept. 5, and the finals on Labor Day.

Men's division champion last year was Al Reside of Uplands Golf Club in Victoria. Ladies' champion was Mrs. Jeanette Forrester of Qualicum Beach.

Adequate Parking for Tenants Must for Saanich Apartments

A bylaw requiring all new apartments in Saanich to provide adequate parking facilities for their tenants, was approved by council's lands and planning committee at a meeting Tuesday.

But the bylaw met stiff opposition from Coun. Leslie Passmore and Joseph Casey who did not see the necessity for imposing restrictions on apartments anywhere in the municipality.

The bylaw to be submitted to council for final approval is similar to the ones in effect in Victoria, Oak Bay and Esquimalt.

Basically it calls for 100 per cent parking space for tenants in apartments. Backyards must be 40 feet in width to allow for adequate loading and unloading space. Buildings must also be set back 25 feet from a street, the same frontage required of all private dwellings.

ONLY TWO SO FAR

Coun. Leslie Passmore said this could not be the reason for the builders moving arising from the lack of off-street parking.

WINNERS of western pleasure horse class at Nanaimo gymkhana were "Spats" and his owner, Helen Stratford, 14, of Victoria. Miss Stratford is the daughter of Capt. and Mrs. Harold R. Stratford, 3930 Cumberland. (George Molecey Photo.)

A BASEBALL GAME, YES, BUT NO ATOMS FOR NIK

WASHINGTON (AP)—Perhaps a football or baseball game but no atomic energy installations will be on the itinerary of Soviet Premier Khrushchev during his visit to the United States next month.

Soviet Ambassador Mikhail Menshikov told reporters that Khrushchev would not visit the atomic electricity-generating plant at Shippingport, Pa., or any other atomic facility.

The ambassador and State Undersecretary Robert Murphy have been meeting periodically to iron out details of the visit which begins Sept. 15.

\$5 MILLION SUIT THREAT IN FIGHT ROW

NEW YORK (UPI)—Fight promoter Vincent J. Velella returned from Sweden today after signing the \$3,000,000 Johansson-Patterson rematch and announced he planned to sue Bill Rosensohn for \$50,000.

Velella said his contemplated suits would be for "defamation of character" in connection with Rosensohn's statements that made him a "front man" for Anthony (Fat Tony) Saterno, a missing mobster.

The youth was charged with attempted murder of Peter John, 19. Police said a bullet fired from outside the window lodged in the mattress of a bed on which John was sleeping. Shots earlier were fired at a CPR diesel train and a CPR section house in the same area.

UNION "WARFARE"

VANCOUVER—Summons charging three members of the Seamen's branch of the Canadian Brotherhood of Railway, Transport and General Workers (CLC) with assaulting a member of a rival union were issued here Tuesday.

Ronald Colby, a member of the Seafarers' International Union, said he was attacked by four men in a Vancouver beer parlor Saturday night.

Colby said he identified the men as former SIU members who joined the Brotherhood.

The two unions are engaged in a jurisdictional battle on the west coast.

BIG CONTRACT LET

VANCOUVER—A \$7,295,582 contract has been awarded to Perini Pacific Limited for construction of the main river piers on the Port Mann bridge at Coquitlam, 20 miles east of here.

The four-lane bridge will connect with the new Trans-Canada Highway and link with the Second Narrows Bridge currently being built across Vancouver Harbor.

Although the West has promised to study the quota idea carefully, so far Britain and the United States have declined to accept or refuse it despite growing Soviet charges of stalling.

Last April the Soviets introduced the idea, picked up from visiting British Prime Minister Harold Macmillan last winter.

The two are expected to use the occasion of their talks in Washington next month to seek agreement on vital issues blocking East-West accord on a treaty to prohibit nuclear weapons tests.

Main stumbling block is the Soviet scheme for a limited quota of on site inspections on U.S. British and Soviet territory to check suspected bootstrap nuclear weapons tests.

The recess will give President Eisenhower and Soviet Premier Nikita Khrushchev a chance to get the negotiations moving again.

The two are expected to use the occasion of their talks in Washington next month to seek agreement on vital issues blocking East-West accord on a treaty to prohibit nuclear weapons tests.
